Invitation to Tender

Section B – Scope Part B NLC

Framework for the Installation and Maintenance of Road Lighting, Traffic Signs and Bollards for North East and North Lincolnshire Councils

YORtender Reference: 100182

FTS Reference:

SCOPE & SCOPE APPENDICES

Preamble to the Scope

1. Tenderers should read this document in conjunction with the following documents listed below:

   ITT Section B - Part A Scope
   Appendix A – Background – NLC

2. The Scope referred to in the tender shall be the 'Specification for Highway Works', published by The Stationary Office (Formerly H.M.S.O) as Volume 1 of the Manual of Contract Documents for Highway Works.

APPENDIX 0/0 – PREAMBLE

The Specification for Highway Works shall be further modified and extended by:-

i. For the purpose of this document Supplier will be defined as Contractor and Client's Service Manager(s) will be defined as Engineer.

ii. Appendix 0/1: Contract-specific Additional, Substitute and Cancelled Clauses and Tables;

iii. The Numbered Appendices listed in Appendix 0/3;;

iv. Appendix 0/5: Special national alterations of the Overseeing Department of Scotland, Wales or Northern Ireland.

3. The relevant publication date of each page of the Specification for Highway Works is given in the Schedule of Pages for Relevant Publication Dates.

4. An Additional Clause, as indicated by a suffix 'A' in Appendix 0/5 is an alteration originating from the Overseeing Department of Scotland, Wales or Northern Ireland. An Additional Clause as indicated by the suffix 'AR' in Appendix 0/1 is a Contract-specific alteration.

5. A Substitute Clause, as indicated by suffix 'S' in Appendix 0.5 is an alteration originating from the Overseeing Department of Scotland, Wales or Northern Ireland. A Substitute Clause as indicated by the suffix 'SR' in Appendix 0/1 is a Contract-specific alteration.

6. A Cancelled Clause, as indicated by suffix 'C' in Appendix 0.5 is an alteration originating from the Overseeing Department of Scotland, Wales or Northern Ireland. A Cancelled Clause as indicated by the suffix 'CR' in Appendix 0/1 is a Contract-specific alteration.

7. Insofar as any of the Numbered Appendices may conflict or be inconsistent with any provision of the Specification for Highway Works the Numbered Appendices shall always prevail. Additionally, Numbered Appendices 0/1 and 0/2 shall take precedence over Numbered Appendix 0/5.

8. Any reference in the Contract to a Clause number or Appendix shall be deemed to refer to the corresponding Substitute Clause number or Appendix listed in Appendix 0/1, 0/2 or 0.5.

9. Where a Clause is altered any original Table referred to in the Clause shall apply unless the Table is also altered. Where a Table is altered any reference in a Clause to the original Table shall apply to the altered Table.

10. Where a Clause in the Specification for Highway Works relates to work goods or materials which are not required for the Works it shall be deemed not to apply.

11. Any Appendix referred to in the Specification for Highway Works which is not used shall be deemed not to apply.

12. Where a Clause in the Specification for Highway Works is prefixed by an # this indicates that this particular Clause has a substitute National Alteration for one or more of the Overseeing Organisations of Scotland, Wales or Northern Ireland. Substitute or additional National Clauses shall be used within countries to which they specifically apply and they are deemed to replace corresponding Clauses in the main text of the Specification for Highway Works as appropriate. The substitute National Clauses are located at the end of the relevant Series together with the additional National Clauses of the Overseeing Organisations.

13. Other than where references to the Overseeing Organisation are made in the context of the Overseeing Organisation granting statutory or type approvals, the roles and functions of the Overseeing Organisation shall be undertaken by the Engineer.

    Where the Specification for Highway Works requires the provision of documentation to the Overseeing Organisation for statutory or type approval such documentation shall be provided to the Client.

13. If the Specification for Highway Works is used in conjunction with a Contract under which the Contractor is responsible for the design of any part of the Permanent Works, the delegation of the roles and functions of the Overseeing Organisation as stated in paragraph 12 above shall be further amended as follows:

    (i) If any agreement, consent or approval required to be obtained from the Overseeing Organisation impacts on the health and safety of the general public, the environment or any property or equipment not owned or operated by the Contractor, such agreement, consent, approval shall be obtained from the Client.

    (ii) Where the Specification for Highway Works provides for the Overseeing Organisation to require a test, waive the requirement for a test or alter testing

frequency, the party to whom the Overseeing Organisation's roles and functions have been ascribed by paragraph
12 above shall exercise such decisions in accordance with the Secretary of State's requirements stated in the Contract.

2701AR	**SERVICE LEVEL AGREEMENT AND KEY PERFORMANCE INDICATORS** Refer to ITT Section B Scope Section 5 Contract Management and Schedule 2
2702AR	**PROVISION OF LIGHTING AND/OR CABLING DESIGN SERVICES** 1. Any of the Contractor's employees and or sub-contractors who are to be engaged to undertake any design works under the Contract shall, prior to undertaking the design works: • have attended the Lighting Design course modules delivered by the Institution of Lighting Professionals (ILP), and or similar approved design courses. • Be able to demonstrate a minimum of 5 years appropriate lighting and cable design experience • Hold a G39 certification. • meet the requirements detailed in the ILP Competency Requirements for Lighting Design Staff Highway Lighting Design Implementation 2. The Designer undertake site survey. 3. The Designer will obtain and collate Statutory Undertakers plant locations. 4. The Designer will design drawings will show new column locations, existing columns to be removed, details and routes of private cable, if required. However, if no cabling is shown this will denote a single phase DNO supply. Drawings will also be produced for all electrical details such as feeder pillars, wiring schematics and termination details. Drawings will also show setting out details. To include; • Position and plan number of columns • Bracket arm and luminaire orientation. 5. The Designer will provide design and calculations for luminance-based designs for each lighting system in the form of an output report from the design software. Illuminance/luminance levels will be provided in the form of either an output report from an approved design software or by drawing. CAD-based design software should be used to show isolux footprints depending on the complexity of the design area. 6. The Designer will provide details of any attachments to be re-installed will be identified in a schedule. The schedule will identify the attachment and the column number to which it is to be attached. Cable design calculations shall fully comply with BS 7671 7. Upon completion of the design a Scope document will be produced detailing

Additional Clauses, Tables and Figures:	
Clause No.	**Title and Written Text**

	all equipment required to install the design on site and will include a setting out schedule detailing;
	• Column setbacks.
	• Mounting height
	  • Bracket Projections
	  • Bracket position
	  • Spigot position
	  • Luminaire angle
	  • Lantern type
	  • Type of optical control
	  • Lamp holder/reflector position.
	  • Maintenance Factor used
	
	8. A Price List will also be produced to allow for accurate pricing by a contractor
	
	9. A design risk assessment shall be produced by designer.
	
	10. Design information to be submitted to the Client for approval
	
	11. Respond to all comments from the Client and amend submission as required.

2703AR	**NUMBERING OF ROAD LIGHTING UNITS, LIT TRAFFIC SIGNS, BOLLARDS AND FEEDER PILLARS.** 1. The apparatus to be numbered and/or renumbered will be identified by the Engineer and a drawing and/or schedule issued to the contractor. The numbering shall fully comply with the requirements of Series 1300. 2. To number or renumber apparatus the contractor shall:- (i) Clean down the area (as agreed with the Engineer to which the number is to be applied and/or remove existing number. (ii) Apply number in position as agreed with the Engineer. (iii) Ensure any surplus materials are removed from site and disposed of in the appropriate manner.

Contract Specific Additional, Substitute and cancelled clauses, tables and figures included in the Contract

Additional Clauses, Tables and Figures:	
Clause No.	**Title and Written Text**
2704AR	**NIGHT PATROL INSPECTION ROUTE** 1. The Client shall submit to the Contractor for his acceptance a night patrol inspection route. The night patrol inspection route shall:- (i) include for the systematic inspection and verification of the existence and condition of every Lighting Unit and enable all Unit Failures to be identified, on specified **traffic routes** supplied by the Engineer. (ii) be commenced between 30 minutes and 90 minutes after sunset (iii) be carried out in the Contractor's vehicle fitted with a GPS tracking system and a roof mounted amber flashing beacon. (iv) include for all night patrol inspection personnel to wear high visibility jackets or vests. (v) include any risk assessment and method statements to comply with the requirements of the Contract and any relevant legislation. 2. From time to time the Engineer may require the Contractor to modify or adjust the accepted night patrol inspection route to take account of any additions or modifications to the Lighting Units. 3. All Unit Failures identified on night patrol inspections shall be checked for accuracy by the Contractor and submitted to the Engineer electronically. The report shall be clearly printed in block capitals on the scouting report form provided by the Engineer.
2705AR	**INSTALLATION / REMOVAL OF BANNERS** 1. The Contractor shall at the request of the Engineer collect banners from a designated store and deliver to site. 2. The Contractor shall provide access equipment appropriate to the task. 3. The Contractor shall visually inspect the banner mounting points and report any defects to the Engineer. 4. The Contractor shall install/remove banners using suitable fixtures and fittings. 6. The Contractor shall at the request of the Engineer remove banners from site and return to designated store.

Contract Specific Additional, Substitute and cancelled clauses, tables and figures included in the Contract

Additional Clauses, Tables and Figures:	
Clause No.	**Title and Written Text**
2706AR	**VERTICAL REALIGNMENT TRAFFIC SIGNS** 1. After supporting the post the Contractor shall carefully excavate by hand in any material, round the lighting unit to below the cable entry, to the existing concrete foundation. Care must be taken during the excavation not to damage the electricity supply cable or any other services that may be present. Should any damage be caused to any of the cables or services during the works then the Contractor will contact the relevant utility company to arrange for repair, and advise the Client of their actions. 2. After vertical realignment the hole shall be backfilled and compacted ensuring that any void between the existing concrete foundation and the surrounding ground has been filled and compacted. 3. The Contractor shall be responsible for making good any damage to the post or its protective system caused during the operation. 4. The works order, issued by the Engineer giving details of each vertical realignment, shall be signed by the Contractor indicating the completed work prior to being returned to the Engineer. The completed forms shall be returned by the Contractor to the Engineer at weekly intervals on completion of the work.
2707AR	**INSTALLATION OF TRAFFIC SIGN POST** 1. The installation of traffic sign post shall fully comply with the requirements of this Series, the appropriate Clause of Series 1200 and amendments as specified in the Contract but shall not include for the supply of the traffic sign post and any electrical works. 2. The works order, issued by the Engineer giving details of each traffic sign post installed, shall be signed by the Contractor indicating the completed work prior to being returned to the Engineer. The complete forms shall be returned by the Contractor to the Engineer at weekly intervals.
2708AR	**INSTALLATION OF TRAFFIC SIGN PLATE** 1. The installation of traffic sign plate shall fully comply with the requirements for this series, the appropriate Clause of Series 1200 and amendments as specified in the Contract but shall not include for the supply of the sign plate, sign post and any electrical work.
2709AR	**VERTICAL REALIGNMENT LIGHTING COLUMNS**

Contract Specific Additional, Substitute and cancelled clauses, tables and figures included in the Contract

Additional Clauses, Tables and Figures:	
Clause No.	**Title and Written Text**
	5. After supporting the column the Contractor shall carefully excavate by hand in any material, round the lighting unit to below the cable entry, to the existing concrete foundation. Care must be taken during the excavation not to damage the electricity supply cable or any other services that may be present. Should any damage be caused to any of the cables or services during the works then the Contractor will contact the relevant utility company to arrange for repair and advise the Client of their actions. 6. After vertical realignment the hole shall be backfilled and compacted ensuring that any void between the existing concrete foundation and the surrounding ground has been filled and compacted. 7. The Contractor shall be responsible for making good any damage to the column or its protective system caused during the operation. 8. The works order, issued by the Engineer giving details of each vertical realignment, shall be signed by the Contractor indicating the completed work prior to being return to the Engineer. The completed forms shall be returned by the Contractor to the Engineer at weekly intervals on completion of the work.

Contract Specific Additional, Substitute and cancelled clauses, tables and figures included in the Contract

Additional Clauses, Tables and Figures:	
Clause No.	**Title and Written Text**
2710AR	**INSTALLATION OF LIGHTING COLUMN AND BRACKET** 12. The installation of lighting column and bracket shall fully comply with the requirements of this Series and the appropriate Clauses of Series 1300, amended as specified in the Contract but shall not include for the lighting column, bracket arm and any electrical work. 13. The works order, issued by the Engineer giving details of each lighting column and bracket installed, shall be signed by the Contractor indicating the completed work prior to being returned to the Engineer. The completed forms shall be returned by the Contractor to the Engineer at daily intervals on completion of the work.
2711AR	**INSTALLATION OF LUMINAIRE, ASSOCIATED ELECTRICAL EQUIPMENT AND WIRING** 1. The installation of luminaire and associated electrical equipment only shall fully comply with the requirements of this Series and the appropriate clauses of Series 1200, 1300 & 1400 and amended as specified in the Contract but shall not include for the luminaire, photocell, column, bracket and foundation. 2. The Contractor shall carefully remove to store any items of equipment instructed by the Engineer. 3. The Contractor shall ensure that the access doors to the column are securely attached before leaving the site. Where it is not possible to lock or repair an existing door a stainless steel band and buckle must be used to prevent unauthorised access. In situations where the door is missing a temporary door must be fitted. Any such repairs shall be reported to the Engineer within 5 working days. 4. The works order, issued by the Engineer giving details of each luminaire and associated electrical equipment installed, shall be signed by the Contractor indicating the completed work prior to being returned to the Engineer. The completed forms shall be returned by the Contractor to the Engineer at weekly intervals on completion of the works.
2712AR	**PROVING ELECTRICAL INTEGRITY OF INTERNAL WIRING AND ASSOCIATED ELECTRICAL EQUIPMENT OF ROAD LIGHTING, LIT SIGN UNIT AND FEEDER PILLAR IN ACCORDANCE WITH BS 7671** 1. The Contractor will be instructed by the Engineer as and when to carry out the proving electrical integrity to a Road Lighting, lit sign unit and feeder pillar. 2. The Contractor shall ensure that the access doors to any columns are securely attached before leaving the site. Where it is not possible to lock or repair an existing door a stainless steel band and buckle must be used

	to prevent unauthorised access. In a situation where the door is missing a temporary door must be fitted. Any such repairs shall be reported to the Engineer within 5 working days. 3. The works order, issued by the Engineer giving details of each Road Lighting, lit sign unit and feeder pillar to be tested, shall be signed by the Contractor indication the completed work prior to being returned to the Engineer. The completed forms shall be returned by the Contractor to the Engineer at weekly intervals on completion of the works.
2713AR	**DOUBLE POLE ISOLATION** 1. The installation of double pole isolator shall fully comply with the requirements of this section and amendments as specified in the Contract but shall not include for the supply of the double pole isolator.
2714AR	**OPTIONAL FUTURE SERVICES** Optional future services may be required, but not guaranteed, by the Client, as listed below, but not exhaustive: • The installation of retrofit LED lamps and/or gear trays to illuminated traffic signs • Painting of lampposts to the Client's Scope requirements • Removal and installation of ticket machines including associated power supply works • Provision and installation of part-night or dimming photo cells • Provision and installation of CMS equipment ie nodes and collectors • Assisting with the installation and maintenance of CCTV projects • Provision and installation of advance notices for road works/schemes etc • Installation of temporary banners/notices etc onto lampposts • Installation of EV Charging pavement Gullys. All the above services, if required, will be on an "as and when" basis.

APPENDIX 1/5 – TESTING TO BE CARRIED OUT BY THE CONTRACTOR

1. The Contractor shall on completion of all new, altered or modified works carry out electrical inspections and tests prior to commissioning or recommissioning the installation.

2. Completion and submission of test certificate to the Engineer as defined in Appendix 12/71 and 13/71.

APPENDIX 1/7 – EXTENT OF CONTRACT AREA AND SITE AND LIMITATIONS ON USE

1. **Extent of Contract Area**

The Contract Area is shown below and covers the County of North Lincolnshire.

About North Lincolnshire

North Lincolnshire is a fantastic place to live and work. Home to just under 170,000 people, our population is set to grow by a further 4,000 over the next 20 years. 37,000 children and young people live in North Lincolnshire, who benefit from highly rated nurseries and schools as well as outstanding support

The area has 76,000 homes situated across 86 settlements, from the busy urban centre of Scunthorpe to tranquil rural hamlets. There is a diverse range of housing with prices well below the national average.

Residents and visitors can enjoy extensive footpaths, cycleways, open spaces and 66 public gardens and parks. There are a wide range of sport and leisure facilities as well as cultural venues promoting local history and creativity

Benefitting from fast and easily accessed transport networks, 5,800 businesses have set up in North Lincolnshire. Unemployment is low and 54% of local jobs are highly skilled. The area is also benefitting from Towns Fund investment that has already delivered improved access to gigabit broadband, a new urban park and solar panels for schools

2. **Limitations on the Use of the Contract Area**

a) The Contractor shall comply with all of the various limitations and restrictions imposed through the Conditions of Contract and the Scope.

3. **Limitations on the Use of the Site**

a) The Contractor will not have exclusive possession of the Site and must cater for other users of the highway within the site.

APPENDIX 1/12 – SETTING OUT AND EXISTING GROUND LEVELS

1. The setting out information shall be as agreed on Site with the Engineer prior to works commencing.

2. In order that the Engineer may carry out the necessary checks, the Contractor shall give 48 hours notice that the setting out will be ready for checking.

3. No work which requires setting out shall be commenced until the setting out has received the approval of the Engineer.

4. Where setting out is undertaken by the Engineer the methods of referencing will be consistent with those used by the Contractor.

APPENDIX 1/13 – PROGRAMME OF WORKS

ROUTINE MAINTENANCE

1. Routine Maintenance (Traffic Signs & Electrical testing)

   (a) The Engineer will provide the Contractor with a works order for routine maintenance works prior to the commencement of the works.

   (b) The Contractor shall provide a programme of Works for routine maintenance on a monthly basis. in the form of a location/time related bar chart produced as a result of a critical path analysis and shall comply with the specific requirements of Appendix 1/13, Part 1.

APPENDIX 1/13 (CONT'D) – PROGRAMME OF WORKS

ADDITIONAL MAINTENANCE

1. Installation Works

   (a) The Engineer will provide the Contractor with works orders for installation works at such intervals as the Engineer may decide detailing the works to be undertaken and the site definition in accordance with the NRSWA as updated in accordance with the Traffic Management Act 2004.

   (1a) Minor Works with Excavation

   Works less than 5 columns within a 500m radius or 10 columns in a street or a 30m length of trench.

   (ii) On non-traffic sensitive streets, a 7-day notice is required to be served by the Engineer following agreement of the Contractor's programme.

   (1b) Standard Excavation

   Works greater than 5 columns within a 500m radius or 10 columns in a street or a 30m length of trench.

   (ii) On non-traffic sensitive streets, a 7-day notice is required to be served by the Engineer following agreement of the Contractor's programme.

2. Emergency Works

   The Contractor may carry out the replacement of damaged sign and road lighting equipment and one for one replacements without the production of a works programme after receipt of a works order from the Engineer and complying with the General Requirements of this Appendix.

GENERAL

1. The Contractor shall take into account in his programme of works the formal notices required in accordance with the Traffic Management Act 2004.

2. The Contractor shall prepare his programme to ensure that all operations shall take place in the general direction of the traffic flow and are carried out during normal working hours, avoiding

peak hours on roads with heavy traffic volumes except where instructed otherwise in writing by the Engineer.

3. During the currency of the Contract other Contractors may be employed to carry out works on the network. The Engineer will notify the Contractor a minimum of two weeks in advance of any lane closures to be implemented by other Contractors. The Contractor may not carry out work in the area of such lane closures other than within the confines of such closures.

4. The Contractor shall notify the Engineer at least two weeks in advance of any closures he wishes to implement.

5. No work shall be undertaken outside daylight hours except with the prior written agreement of the Engineer.

6. The Contractor shall provide on a weekly basis detail of the work completed during the preceding week and shall provide separately the proposed work for the following week.

APPENDIX 1/17 –TRAFFIC SAFETY AND MANAGEMENT

TRAFFIC SAFETY AND MANAGEMENT REQUIREMENTS

Documents Referred To

Traffic Management Act 2004	DfT
New Roads and Street Works Act 1991	DfT
Department of Transport / County Surveyor's Society Joint Report providing Notes for Guidance in relation to the implementation of the requirements of the Health and Safety at Work Act 1974 so far as they affect personnel who are required to undertake work on Motorways and Trunk Roads	DTp/CS.JR
Traffic Signs Manual – Chapter 8 – Traffic Signs Safety Measures and Signs for Road Works and Temporary Situations: 2009 published by The Stationary Office, TSO (Formerly HMSO)	TSM8

The recommendations, in relation to all purpose single and dual carriageway Trunk Roads, of the DTp/CS.JR are considered to be equally applicable to non-trunk roads. The Contractor shall take this into account, when carrying out work on any trafficked highways.

1. TRAFFIC MANAGEMENT - GENERAL

   a) North Lincolnshire Council shall issue the relevant notices under the Traffic Management Act 2004.

   b) The Contractor shall give 2 weeks notice to the Client with respect to requiring a notice to be submitted under the Traffic Management Act 2004

   c) The Contractor will be responsible for providing regular and timely updates as far as progress to the client to ensure compliance with the Act.

2. SAFETY AT ROADWORKS

   a) The Contractor shall comply with the Traffic Signs Manual – Chapter 8 "Traffic Safety Measures and "Safety at Street Works and Roadworks: 2013" and any subsequent amendments thereof, and equip maintenance vehicles with all necessary amber flashing beacons on the cab and at the rear.

3. TRAFFIC SAFETY AND MANAGEMENT FOR SHORT DURATION WORKS

   i) ROADS FOR NORMAL WORKING HOURS

   a) The Contractor shall comply with the Traffic Signs Manual – Chapter 8 "Traffic Safety Measures and "Safety at Street Works and Roadworks: 2013" and any subsequent amendments thereof, and equip maintenance vehicles with all necessary amber flashing beacons on the cab and at the rear.

b) High Visibility fluorescent yellow retro reflective clothing to BS EN 471:2003 shall be worn by all persons working on the public highway.

ii) ROADS WITH RESTRICTED WORKING HOURS

(a) When carrying out Works on dual carriageways, classified roads and other roads that are traffic sensitive, the Contractor shall liaise with the Engineer and where necessary the Police in respect of restricted working hours and traffic regulations and control before commencing of Works.

(b) The restrictions, which vary from time to time, exist to control the placing and removal of cones and/or temporary traffic signs and/or obstruction of continuous two-way traffic flow. These restrictions generally apply during the following times:-

Monday - Saturday
i) 07.30 – 09.30 hours
ii) 15.30 – 19.00 hours

iii) GENERAL

a) Where the circumstances of any particular case are not covered by the recommendations of Chapter 8, the Contractor shall submit his proposals for dealing with such situations in writing to the Engineer for his approval at least 7 days before the works are to commence.

b) Compliance with this Clause shall not relieve the Contractor of any of his obligations and liabilities under the Contract and under the relevant provisions of the Highways Acts.

4. DIVERSION OF TRAFFIC

a) The Contractor shall advise the Engineer as to the period of time which he will require in order to carry out the maintenance operations on each dual carriageway, trunk road or principal road. The Engineer will agree with the Contractor and the arrangements, dates and times for the necessary lane closures having carried out the necessary consultations. The Engineer will give the Contractor not less than six weeks notice of these arrangements, although the Engineer reserves the right to cancel or modify the arrangements of short notice due to overriding circumstances.

5. GENERAL

a) When planning the traffic safety and management measures the Contractor shall include for either covering, blanking-out or attaching alternative messages to existing permanent traffic signs, within or outside the area of the Works, which conflict with the traffic safety and management proposals. These temporary alterations to permanent traffic signs shall, where the Engineer gives his consent, be carried out by the Contractor, in compliance with Clause 1209, at the appropriate time in accordance with his traffic safety and management programme.

b) At least one traffic lane must be kept open to traffic in each direction on all dual carriageway roads at all times except when provision has been made in the Contract for other arrangements.

c) The control of traffic by means of traffic control signals, priority control of “Stop-Go” boards will not be permitted on any dual carriageway, Trunk or Principal Road even when operating as a single carriageway under traffic management.

d) With respect to the safety zone, in addition to TSM8 and Dtp/CS.JR the following additional requirements shall apply:-

The minimum clearance between any area in which work is being undertaken and any part of the trafficked carriageway shall be 1.2 metres for all dual carriageways and single carriageways subject to a speed restriction of 50mph or greater and 500mm for single carriageways subject to a speed restriction of less than 50mph. The outer boundary of the safety zone shall be marked in the usual way by traffic cones and/or cylinders. The inner boundary should be marked physically in an appropriate way wherever practicable to attract the workmen's attention to the limits of the working area.

e) Portable traffic signals must be of a type approved by the DTp under Section 65 of the Road Traffic Regulation Act 1984, Type Approval of Traffic Signal Equipment.

f) Except when under the protection of cones and barriers, all site traffic must comply with the normal highway regulations. Site traffic may only enter or leave the working area using the designated entry or exit points, as shown in the Contract Documents or agreed by the Engineer, and must do so in the direction of traffic flow. The Contractor shall not allow Site traffic to cross the central reserve of a dual carriageway to enter or exit the Works.

6. TEMPORARY SIGNS

a) All signs used for traffic management and control shall be lit during the hours of darkness if erected in a lit area or within 50 metres of the last lighting column of a lit area.

b) A minimum clearance of 450mm shall be provided between the carriageway in use and the nearest part of any temporary sign (excluding cones, cylinders, road markings and studs) or its supporting structure. Where this clearance cannot be met the signs shall be angled within the limits shown in Chapter 8. If this does not achieve sufficient clearance, and a satisfactory alternative location for the sign cannot be found, then the next smaller size of a sign shall be used and similarly angled, if necessary, to provide the specified clearance.

c) The Contractor shall erect and maintain all temporary portable signs in a manner to prevent them blowing over. Where signs have to be weighted down this should be in the form of fine granular material in a sack so that, should an impact occur, the sack will split and the contents be dispersed without causing further problems.

d) All cones and traffic cylinders used in traffic control on the Site shall be kept clean at all times throughout the period control to the satisfaction of the Engineer. Where a cone or traffic cylinder no longer has satisfactory reflective properties on its outer surface the Contractor shall replace the cone or traffic cylinder with one to the required standard or renew the plastic reflective sleeve, whichever is appropriate.

APPENDIX 1/21 –INFORMATION BOARDS

Information Boards shall be erected to the requirements of this Appendix.

1. Information Boards shall be provided on all sites which have a duration of more than 24 hours and where Traffic Management is left in place.

2. The Information Board shall carry the name of the Client, Contractor, Description of Work with contact Telephone Number for emergencies and be in accordance with The Traffic Signs Regulations and General Directions 2002, diagram No 7008.

3. Where the works are of a shorter duration and define as Category “C” Works as defined by Chapter 8 of The Traffic Sign Regulations, Information Boards will not be required however, all contractor’s plant must be properly identified with his name, address and telephone number for information and contact purposes.

4. The contractor shall equip all vehicles with demountable sign boards that advise that the Contractor is employed on works on behalf of North Lincolnshire Council.

APPENDIX 1/23: SUBSTANCES HAZARDOUS TO HEALTH

1. Substances hazardous to health shall include any material, which is either sprayed or dust which results from the mechanical cutting of road pavement or footpath materials which would cause discomfort or inconvenience to residents or occupiers of the adjacent properties or the public who are passing the Works. The Contractor shall consult with the Local Environmental Health Officer prior to undertaking such works and if so required, the Contractor shall undertake air quality monitoring.

2. Where substances are identified as being hazardous to health, a discomfort or an inconvenience to the workforce, residents or occupiers, the Contractor shall take all necessary precautions (e.g. using dust collection or damping down facilities on cutters) to prevent such hazard, discomfort or inconvenience and shall indicate in his method statement the proposals for dealing with such matters.

3. The Contractor shall be aware of the guidelines for the use of substances hazardous to health given in Advice Note SA 8/94. In particular it is anticipated that the following substances classified in the Advice Note are expected to be used and/or encountered and the Contractor shall follow the precautions contained therein for each substance.

Low Risk

Bituminous Tape	Sand	Natural Aggregate
Pulverised Fuel Ash	Blast Furnace Slag	Water Based Admixtures
Dust from cutting of Asphalts and Macadams		

Moderate Risk

Bitumen Joint Sealing Compounds etc	Thermoplastics
Cementitious Mortars and Grouts	Cement
Bitumen Cut Back	Concrete
Dust from Concrete, Cement etc	

High Risk

Bituminous Primers and Coatings

4. The Contractor shall not be relieved of his obligations under COSHH legislation.

5. The Contractor shall at all times prevent the spread by any means whatsoever of substances hazardous to health from a working area to an adjacent area.

APPENDIX 1/24: QUALITY MANAGEMENT SYSTEM

1. The Contractor shall institute and operate a quality management system complying with BS EN ISO 9002. The quality management system shall be described in a Quality Plan that shall be submitted to the Engineer for his acceptance.

   The Quality Plan shall cover the following items:

   i). Contractor's organisation and management
   ii). Contractor's method statements and construction procedures
   iii). Contractor's construction quality control

2. Items i) and iii) of the Quality Plan shall be submitted to the Engineer for his acceptance not later than 21 days after the award of the Contract.

   The Contractor shall submit other parts of the Quality Plan prior to start of any related work or activity and to a timetable included in item i).

3. Method statements are required in the Health and Safety Plan as listed in section 4.4 of Volume 3 Pre-Tender Health and safety Plan.

4 QUALITY PLAN REQUIREMENTS:

4.1 Contractor's Organisation and Management

This section of the Quality Plan shall include the following:

i). Definition of the Contract and its documentation.

ii). The organisation of the Contract, including the line of command and communication links between parties involved in the Contract

iii). Names, roles, responsibilities and authority of principals and key personnel.

iv). Identification of the Contractor's own staff responsible for overseeing each major activity.

v). The Principal Contractor's control of sub-contracts.

vi). Document control.

vii). Programme for submission of method statements and Suppliers Quality Plans. The Quality Plan shall identify procedures (which may be a part of the Contractor's general procedures) that cover the topics listed below. Copies of these procedures shall be made available to the Engineer on request.

viii). The quality plans for sub-Contractors and suppliers of work, goods and materials which are the subject of quality management schemes.

ix). Procedure for the preparation, review and adjustment of programmes for the effective progression of the Works and the recording of this.

x). Control and approval of purchases of materials.

xi). Control of off-site activities (where appropriate).

APPENDIX 1/24 (CONT'D): QUALITY MANAGEMENT SYSTEM

xii). Procedures for the regular review and recording by the Contractor of the quality of the Works.

xiii). Control of personnel selection, based on their care, skill and experience.

xiiii). Management review/audits to monitor and exercise adequate control over the implementation of the quality plan.

xv). Any other relevant item.

4.2 Contractor's Method Statements and Construction Procedures

This section of the Quality Plan shall include:

4.2.1 Detailed method statements for each major activity whether directly controlled or subcontracted.

The method statements shall identify hold points and invoke:

i) Work instructions;

ii) Quality control procedures;

iii) Risk assessments;

iv) Compliance testing / inspection arrangements;

v) Any work acceptance procedures;

vi) For all activities that might affect the quality of the permanent and temporary works.

4.2.3. Identify the relevant construction procedures in the Contractor's own Quality Management System (and provide copies on request).

4.3 Contractor's Construction Quality Control

This section of the Quality Plan shall include:

4.3.1. Statement of the Contractor's organisation for quality control.

The quality plan shall identify procedures (which may be a part of the Contractor's general procedures) that cover the topics listed below. Copies of these procedures shall be made available to the Engineer on request.

4.3.2. Arrangements for 'receiving' and 'in-process' testing.

4.3.3. Control of test laboratories.

4.3.4. Control of test, measuring and inspection equipment.

4.3.5 Document control.

4.3.6. Procedure for monitoring and recording the inspection, test and approval status of the constructed/installed work.

4.3.7. Procedures for test and inspections for the purpose of the Contractor certifying that prior to covering up, each part of the Works are complete and conform to the Contract.

4.3.8. Procedure for the review of work submitted for review but not accepted as conforming to the Contract

4.3.9. Procedure for the collation of quality records as identified in BS EN ISO 9002, and provision of copies when requested by the Engineer.

4.4 Suppliers' Quality Plans

The Quality Plan shall include:

4.4.1. Definition of the product or service to be provided.

4.4.2. The organisation of the Supplier describing the line of command and stating the name of the senior manager responsible for the contracted Work and the names of the Supplier's on-site management representative. Contact addresses, telephone numbers etc. shall be provided.

4.4.3.* Identification of the relevant parts of the Supplier's quality system relevant to the product or service being provided. (Copies to be provided to the Engineer on request).

4.4.4. The control of personnel selection (at works and on site), including special requirements for skilled personnel, e.g. certification of welders, training of operatives, experience requirements etc.

Specific procedures for the following:

4.5.5.* Receipt and examination of certificates of conformity and test results for purchased products.

4.5.6.* Product identification and traceability.

4.5.7.* Handling, storage, packaging and delivery to Site and storage and handling on Site.

4.5.8 Quality records.

Note: Items marked * where available and appropriate, copies of the supplier’s quality system / general procedures may be acceptable

5 CONTRACTOR ACCREDITATIONS / MEMBERSHIP CRITERIA

The Contractor will also have accreditations / membership of the following:

Highways Electrical Registration Scheme (HERS) to NHSS8
National Electrical Registration Scheme (NERS)
National Inspection Council for Electrical Installation Contracting (NICEIC)
Construction line
Contractors Health and Safety Scheme (CHAS)

STANDARD SPECIFICATION AND CODE OF PRACTICE

Where an appropriate British Standard Specification or British Standard Code of Practice, issued by the British Standards Institution, is current at the date of tender, the Contractor is required to ensure that all goods and materials used or supplied and all workmanship shall be at least in accordance with that Standard.

APPENDIX 2/3 – RETENTION OF MATERIALS ARISING FROM SITE CLEARANCE

The Contractor shall comply with the following additional conditions on the retention of materials arising from the site clearance of road lighting units, lit traffic signs, traffic signs and associated equipment during the currency of the Contract.

(i) The following materials are to be removed from site and transported to, and stored at the Clients Depot for re-use on the Contract as instructed by the Engineer on the works order:-

(a) Steel road lighting columns, brackets and traffic sign posts

(b) Road Lighting Luminaires

(c) Feeder Pillars

(d) Lit/non-lit traffic bollards including bases

(e) Lit sign external luminaires

(f) Traffic Sign Plates (various sizes)

(g) Festive & Summer Illuminations

APPENDIX 2/5 – HAZARDOUS MATERIALS

MATERIALS HANDLING

Documents Referred To.

Department of Environment, environmental Protection Act 1990.
Waste Management The Duty of Care. A Code of Practice.

1. Waste materials such as lamps and capacitors shall be disposed of in a safe manner in accordance with current regulations to ensure that substances which may be contained therein shall not be hazardous to health.

APPENDIX 5/2 – SERVICE DUCT REQUIREMENTS

1. Ducts for road lighting shall be in accordance with HCD drawing No: I2 and the following:-

   a) All ducts shall be of the Unplasticised polyvinyl-chloride (UPVC). Ducts shall be orange in colour, and ribbed, and be identified by means of continuous durable marking along the length with the following wording “STREET LIGHTING”.

   b) The average depth to invert 700mm in carriageway and 450mm in verges and footways.

   e) The ground level shall be taken at existing ground and depth of duct and all measurements shall be taken from this datum.

APPENDIX 6/70 – EARTHWORKS SCHEDULE

1. HARD MATERIALS

These shall be as defined and consist of the following:-

a) existing pavements
b) footways
c) paved areas

The units and depth of this material are shown on the Reinstatement Schedule contained in Appendix 7/2.

2. UNACCEPTABLE MATERIALS

These shall be any unbound material forming part of any of the above constructions, the limits and depths are as shown on the Reinstatement Schedules contained in Appendix 7/2.

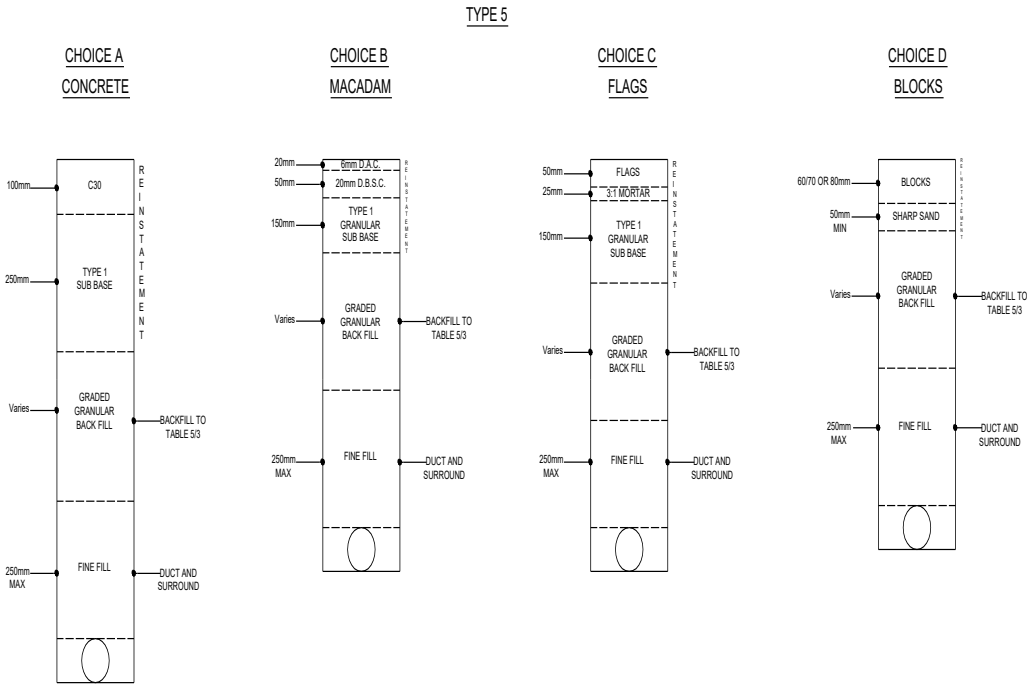
APPENDIX 7/2 – EXCAVATION, TRIMMING AND REINSTATEMENT OF EXISTING SURFACES

1. All permanent reinstatements of carriageways and of footways shall be carried out in accordance with the Highways Authorities & Utilities Committee Specification for the Reinstatement of Openings in Highways published by the Stationary Office (Formerly H.M.S.O) and dated April 2010 (3rd Edition).

2. Reinstatements shall be carried out as instructed by the Engineer and will be detailed on the Works order. Details of completed reinstatements will be supplied to the Engineer. Details will include location, measure and date of each reinstatement carried out.

3. When agreed with the Engineer a temporary reinstatement may be carried out but this must be permanently reinstated within 10 days where the works do not involve the reconstruction of footways.

3. The temporary reinstatement shall be with the same material removed from the site during excavation and after defining shall be compacted in layers to within 50mm of the finished surface, the void is then to be filled with a layer of cold lay blacktop material of nominal size 20mm.



The vertical faces of the adjoining road surfacing must be treated with an approved bitumastic material before laying the wearing course. On new installations, neither the apparatus nor the fine fill may encroach into the sub base.

APPENDIX 12/70 – ROUTINE MAINTENANCE OF TRAFFIC SIGNS, BOLLARDS AND BEACONS

1. SCHEDULE OF LIT TRAFFIC SIGNS, BOLLARDS AND BEACONS

(a) The 'Schedule of Lit Traffic Signs, Bollards and Beacons' in Appendix 12/70 is a summary of the main inventory of illuminated traffic signs, bollards and beacons and is for information only. Full schedules will be made available to the successful Contractor.

(b) The information on the main inventory is constantly updated from information supplied by the maintenance Contractor and the District Network Operator and regular updates of the inventory schedules will be supplied to the Contractor.

2. RECORD OF EQUIPMENT INSTALLED

(a) A comprehensive survey has been carried out to record all lit traffic signs, bollard and beacon equipment owned and operated by the Local Authority.

(b) The Contractor shall be responsible for providing "As Built" plans and Schematics for all changes and/or additions to the lit traffic signs, bollards and beacons as they occur, and also updating the Council's Asset Register on the mobile device.

(c) Lit Traffic Sign, Bollard and Beacon Data shall be updated on the Asset Register for all:-

New Units
Removed Units
Resited Units
Changes to - Posts, brackets, lamp type and/or wattage, luminaires, controls, burning hours, supply, numbering.

(d) The Contractor shall notify the Engineer within 5 working days of units which are ready to be disconnected or require servicing.

(e) The computer inventory can be interrogated to produce summaries under various headings for all information contained on the computer. This information will be available from the Engineer on request.

3. ISSUING OF INSTRUCTIONS TO THE CONTRACTOR (WORKS ORDERS)

(a) The Engineer will issue the Contractor with a Works order for routine maintenance programmes.

(b) On completion of the operations listed on the works order the Contractor shall return the signed and dated works order to the Engineer listing any additional operation numbers for labour and/or materials used.

1. The Contractor shall comply fully with the requirements of Clause 1 to 3 of Appendix 12/70 in respect of all works undertaken as additional maintenance of traffic signs.

CONTRACTOR RESPONSE TIMES

ACTIVITY	ACTION TO BE TAKEN BY CONTRACTOR
Electrical Test	Inspect and test all cable networks which are the responsibility of the Engineer in accordance with BS7671 and return the Works order to the Engineer within 30 working days of the works being issued.
Standby Callout	Notify the Engineer on the Contractor Callout form by email, by 08:30 hours the following day. If it is following an R.T.C. and requires DNO attendance to disconnect, notify the Engineer by telephone immediately during normal working hours, or NELC Security Service out of normal working hours.

2. ISSUING OF INSTRUCTIONS TO THE CONTRACTOR (WORKS ORDERS)

(a) The Engineer will issue the Contractor with a Works order on a weekly basis for additional maintenance.

(b) On completion of the operations listed on the works order the Contractor shall return the signed and dated works order to the Engineer listing any additional operation numbers for labour and/or materials used.

APPENDIX 13/70 – MAINTENANCE OF STREET LIGHTING UNITS

1. SCHEDULE OF LIGHTING POINTS

(a) Details of the Schedules forming part of Appendix 13/70 will form part of the Contract.

(b) The 'Schedule of Lighting Points' is a summary of the main inventory of lighting points and is for information only.

(c) The information on the main inventory is constantly updated from information supplied by the maintenance Contractor.

2. RECORD OF EQUIPMENT INSTALLED

(a) A comprehensive survey has been carried out to record all street lighting equipment owned and operated by the Council.

(b) Records are held in the form of a computer inventory.

(c) The Contractor shall be responsible for providing "As Built" plans and Schematics for all changes and/or additions to the street lighting systems as they occur.

3. DATA COLLECTION

(a) The Engineer may instruct the Contractor to undertake any over and above data collection at the specified dayworks rate.

(b) A cable schematic of each individual cable network showing each individual lit traffic sign, lit traffic bollard and street lighting unit will also be produced by the Contractor.

5. ISSUING OF INSTRUCTIONS TO THE CONTRACTOR (WORKS ORDERS)

(a) The Engineer will issue the Contractor with a Works order contained in Appendix 13/71 on a weekly basis for maintenance programmes.

(b) On completion of the operations listed on the works order the Contractor shall return the signed and dated works order to the Engineer listing any additional operation numbers for labour and/or materials used.

RULES FOR WORKING IN THE VICINITY OF NORTHERN POWERGRID OWNED EQUIPMENT

1. Cut Outs

1.1 When a cut-out fuse has been removed for the purpose of work or testing on the outgoing side of a Northern Powergrid owned cut out, the live exposed phase terminal on the incoming side shall be shrouded with Northern Powergrid approved insulating material and shall so for such time as the cut out cover is removed.

1.2 Under NO circumstances shall a cut out be disconnected from the Northern Powergrid supply cable.

1.3 Northern Powergrid cut outs shall not be left unattended when columns or the furniture housings have been removed, unless they have been protected against unauthorised interference by a substantial temporary housing suitably marked to warn of live apparatus.

1.4 Only HRC fuselinks approved by Northern Powergrid shall be used in Northern Powergrid cut-out fuse carriers.

1.5 Northern Powergrid must be notified without delay of any danger, repair requirement or suspected defect in their equipment. No attempt should be made to interfere with Northern Powergrid equipment which is damaged or suspected to be faulty.

2. **LAMPS ON OVERHEAD LINE SUPPORTS**

2.1 The initial erection of furniture and fittings on Northern Powergrid posts and supports must be carried out by Northern Powergrid staff.

2.2 Northern Powergrid must be notified without delay of any danger, repair requirement or suspected defect in their equipment. No attempt should be made to interfere with Northern Powergrid equipment which is damaged or suspected to be faulty.

2.3 Adequate earthing of metalwork of a street lighting fitting is not to be assumed and is to be regarded as live until proven otherwise.

2.4 Wood poles must be sounded and prodded for the detection of any decay before being climbed; wood poles marked with a “D” symbol or otherwise suspected to be unsound shall not be climbed by ladder or climbing irons.

2.5 No person shall work on a pole or support unless in visual range of a second person.

2.6 No metal ladder, or ladder with metal stile reinforcement, shall be used on Northern Powergrid poles or supports.

2.7 Nothing must be done to conceal or obliterate a “D” symbol on a pole.

2.8 Work must be conducted in such a manner that no part of the body, working tool or any part of the working platform is within a distance of 1.0m of any exposed overhead conductor operating at up to 650 volts. Northern Powergrid will undertake any work necessary on such installation where 1.0m clearance cannot be observed, where the bracket level is level with, or above, the overhead line.

2.9 When working on columns in the vicinity of overhead lines operating above 650 volts, a minimum safe working clearance of 3.0m between any part of the body or tool or equipment and the overhead line must be maintained at all times. No part of working platforms used in the vicinity of overhead lines operation above 650 volts must be raised to a height greater than 1.0m below the top of the column. The platform must be kept as close to the column as practicable.
Where hinged columns are installed in the vicinity of overhead lines, operatives must not ascend to the top of the column which is in the raised position unless, on account of special circumstances, authority in writing is forst obtained.

NOTE: NO OTHER WORK OTHER THAN THAT AUTHORISED OVERLEAF WILL BE CARRIED OUT AT ANY TIME

APPENDIX 14/1 – SITE RECORDS

As-built drawings shall be produced by the Contractor on a pdf or word document for the lighting and lit traffic sign installation on request of the Engineer. These completed drawings shall be in accordance with the following :-

(a) They shall incorporate the maintenance or operating manuals for installed equipment;

(b) All apparatus subject to a public view record must be surveyed on site with the location measurements (i.e. the position of apparatus relative to features appearing on the base map) being measured and recorded to an accuracy of +/- 0.1 metre. Sufficient measurements must be taken on site to represent accurately the line of the apparatus.

(c) The site records shall include details of all road lighting columns, lit traffic sign units, lit traffic bollards and pedestrian refuge and/or crossing beacons.

(d) Cable schematics shall be provided for each feeder pillar/feeder column and shall show in schematic form the following information:

i) each individual circuit;

ii) individual cable size and configuration;

iii) all columns, lit traffic signs, lit traffic bollards per circuit;

iv) all columns, lit traffic signs, lit traffic bollards shall be identified by their individual painted identification number/letter – all feeder pillars/feeder columns to be numbered with suffix ie “FP”.

v) All cable joints.
