- The freezer must maintain temperature within acceptable range to ensure product, sample, or reagent integrity. The range accuracy of alarm setting must be +/- 0.10C and accuracy of thermometer must be +/-1.0 degrees or better. For a -400C freezer the tolerance must be +/- 50C or better. For a -35 degrees C the freezer the tolerance must be +/- 4 degrees C or better.
- The freezer must operate using a UK standard plug for a 240V electrical supply.
