II.1.4) Short description

The CAFRE Soil Carbon Coring Project has been developed by technologists at CAFRE to obtain a field level baseline of soil carbon stocks, soil nutrient and carbon properties at the five CAFRE estate farms in Northern Ireland. The project will provide CAFRE with a dataset that can be used for the delivery of innovation projects and industry demonstration on the management of soil carbon stocks and soil sequestration rates across a wide array of soil types, land uses and management practices. The project objectives are to - provide a detailed accurate measurement, analysis and establishment of a dataset of soil carbon stocks on active agricultural soils and on non-active agricultural/farmland soils at an individual field and subsequent whole farm level at each CAFRE farm centres - sample, analyse and report on broad soil nutrient and carbon properties at 0 – 7.5 cm depth on grassland areas and 0 – 15 cm on arable areas at an individual field and subsequent whole farm level at each CAFRE farm centre.. CAFRE wishes to establish a contract for a Supplier to provide a stratification and sampling plan, in-field sampling, lab analysis and reporting of soil carbon stocks. In addition, the supplier will provide the provision of sampling for broad soil nutrient analysis, and soil carbon properties from across the CAFRE estate farms, which are to be analysed by NRM Cawood Laboratories. For further information please see the Specification document.

Section VI. Complementary information

VI.3) Additional information

Contract Monitoring - The Contractor's performance on the Contract will be regularly monitored in line with the tender documentation. Contractors not delivering on contract requirements is a serious matter. It means the public purse is not getting what it is paying for. If the contractor fails to reach satisfactory levels of contract performance they will be given a specified time to improve. If, after the specified time, they still fail to reach satisfactory levels of contract performance, the matter will be escalated to senior management in Construction and Procurement Delivery (CPD) for further action. If this occurs and their performance still does not improve to satisfactory levels within the specified period, it may be regarded as an act of grave professional misconduct and they may be issued with a Notice of Unsatisfactory Performance and the contract may be terminated. The issue of a Notice of Unsatisfactory Performance can result in the Contractor being excluded from all procurement competitions being undertaken by Centres of Procurement Expertise on behalf of bodies covered by the Northern Ireland Procurement Policy for a period of three years from the date of issue.

VI.4) Procedures for review

VI.4.1) Review body

The UK does not have any such bodies with responsibility for appeal/mediation procedures. Instead, any challenges are dealt with by the High Court, Commercial Division, to which proceedings may be issued regarding alleged breaches of the PCR 2015 as amended.

VI.4.3) Review procedure

Precise information on deadline(s) for review procedures

CPD complied with the Public Contracts Regulations 2015 and incorporated a standstill period (i.e. a minimum of 10 calendar days) at the point information on the award of contract was communicated to tenderers. That notification provided full information on the award decision. This provided time for the unsuccessful tenderers to challenge the award decision before the contract was entered into.
