II.2.4) Description of the procurement

Phases 3, 4 & 5 of the Street Lighting LED programme is aimed predominantly at traffic routes across the City. The contract will include the replacement of approximately 3000 life expired concrete lighting columns along with around 19,000 LED lantern conversions.

Phases 1 & 2 of the Street Lighting LED programme have demonstrated the energy savings that can be achieved. The continuation of the programme will help reduce further the costs associated with the street lighting asset but will also help the Council reduce its CO2 emissions and annual electricity consumption.

During Phase 2 of the programme, concrete columns on traffic routes were identified as having a high risk of structural failure due to their age and condition. As a result, Phase 3, 4 and 5 of the programme will prioritise the replacement of these columns reducing the risk of failure and subsequent risk of damage to property and persons and the disruption to traffic on key routes across the City.

The programme must be complete in 18 months.
