NHS London Procurement Partnership will add an additional category to the existing HealthApps DPS; Category 26 – NICE Accredited Apps. An evidence-based therapeutic intervention delivered through software to prevent, manage, or treat a medical disorder or disease. They are typically accessed via a smartphone app or online and engage the patient without the involvement of a clinician. The evidence-based therapeutic intervention must be registered as a medical device and must be regulated by the MHRA for use in the

UK. The evidence-based therapeutic intervention must be compliant with the Digital Technology Assessment Criteria (DTAC). Sub-Category 26.1 – Digital cognitive behavioural therapy for adults with insomnia An evidence-based therapeutic intervention delivered through software to prevent, manage, or treat insomnia and insomnia symptoms. This intervention will be accessed via a smartphone app or online and engage the patient without the involvement of a clinician. The evidence-based therapeutic intervention must be registered as a medical device and must be regulated by the MHRA for use in the UK. The evidence-based therapeutic intervention must have proprietary Randomised Controlled Trial evidence that demonstrates safety and efficacy. The evidence-based therapeutic intervention must be compliant with the Digital Technology Assessment Criteria (DTAC).
