Contract

## **Biofoundry DNA Script SYNTAX equipment (and optional Hamilton liquid handler)**

CENTRE FOR PROCESS INNOVATION LIMITED

UK7: Contract details notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2026/S 000-000241

Procurement identifier (OCID): ocds-h6vhtk-05ce75 ([view related notices](#))

Published 5 January 2026, 11:54am

### **Scope**

### **Reference**

3699

### **Description**

CPI require equipment to manufacture DNA to support the Biofoundry programme. This equipment is specifically designated in the business case and forms part of the programme from OLS via Innovate UK.

This equipment forms the first stage of the Biofoundry process, producing the synthetic DNA templates that are essential to supply in-vitro transcription (IVT) and the subsequent RNA-LNP manufacturing workflow

## **Contract 1. Biofoundry - DNA Script SYNTAX equipment (and Hamilton liquid handler)**

### **Supplier**

- [DNA SCRIPT](#)

### **Contract value**

- £2,500,855.93 including VAT

Above the relevant threshold

### **Date signed**

3 December 2025

### **Contract dates**

- 3 December 2025 to 30 September 2028
- 2 years, 9 months, 29 days

### **Main procurement category**

Goods

### **CPV classifications**

- 38434500 - Biochemical analysers

---

## Other information

### Conflicts assessment prepared/revised

Yes

---

## Procedure

### Procedure type

Direct award

### Direct award justification

Single supplier - unique work of art or performance

The equipment is a prototype developed specifically to enable the Biofoundry the capability of being a 'DNA printer'. Forming a core element of the Biofoundry, it will allow bespoke DNA to be printed to support the manufacture of RNA-LNP. It will allow multiple, complex DNA candidates to be manufactured quickly, in house for a reasonable price. Facilitating the Biofoundry model. The UK Biofoundry forms part of the broader worldwide Biofoundry network. Initiated by the charity, Wellcome Leap inc, the vision is to enable early-stage academics and SME's access to cost effective RNA-LNP to enable more shots on goal with this life changing technology while enhancing the worlds pandemic readiness. The Biofoundry network, via Wellcome Leap, has directly funded development of the UK Biofoundry equipment
