II.1.4) Short description

The South East Integrated Care Boards (ICBs) are seeking suitably qualified Providers to deliver at-scale sight testing and dispensing of spectacles services for children and young people with Special Educational Needs and Disabilities (SEND) in Special Educational Settings (SES) across the region.

This procurement covers five lots aligned to the current six and future four ICB structures, ensuring continuity through planned mergers and boundary changes:

Lot 1: Thames Valley - Buckinghamshire, Oxfordshire, Berkshire West and Berkshire East

Lot 2: Hampshire and Isle of Wight, including North East Hampshire

Lot 3: Kent and Medway

Lot 4: Surrey, including Surrey Heath and Farnham

Lot 5: Sussex

Please note: This procurement begins with six Integrated Care Boards (ICBs) in the South East. From 1 April 2026, these will reduce to four ICBs:

- NHS Thames Valley ICB - bringing together Buckinghamshire, Oxfordshire, Berkshire West and Berkshire East (formerly BOB ICB and part of Frimley ICB)
- Hampshire and Isle of Wight ICB will expand to include North East Hampshire
- Kent and Medway ICB remains unchanged
- Surrey and Sussex ICB - bringing together Sussex and Surrey including Surrey Heath and Farnham

These changes are designed to improve integration, reduce health inequalities, and align services with local government boundaries to deliver better, more sustainable care.

Children and young people with autism and/or learning disabilities face significant barriers to accessing routine eye care. Evidence from the 2021 NHS England Proof of Concept (POC) programme showed that delivering sight tests and dispensing services directly within Special Educational Settings (SES) is both effective and impactful.

This service aims to ensure that eligible children and young people in SES across the South East are offered an annual sight test, unless clinically inappropriate. The goal is to reduce health inequalities, improve educational outcomes, and support better quality of life through timely identification and management of vision needs.
