II.2.4) Description of the procurement

Please note this is a Market Consultation Document ONLY, not a procurement exercise, and Jisc Services Limited (JSL) is not seeking tenders at this stage.

We are a membership organisation providing digital solutions tailored to the needs of UK education and research. Our group purchasing scheme offers a transparent, equitable, and cost-effective way for members to acquire survey software designed to support comprehensive data collection, analysis, and reporting.

Given the increasing importance of data-driven insights in education and research, we prioritise solutions that deliver secure, efficient, and user-friendly capabilities for survey creation, distribution, and analysis. Key features of interest include advanced survey design tools, effective interoperability and integration with institutional systems, compliance with data protection regulations, and robust data reporting functionalities that enable clear data visualisation and interpretation.

Enhanced functionalities such as multilingual support, accessibility compliance, predictive analytics, and integrations with learning management systems (LMS) further add value. We are inviting vendors to participate in our scheme who can provide innovative, secure, and cost-effective solutions meeting these requirements, ensuring our members benefit from reliable and scalable tools that support their strategic goals.

II.2.14) Additional information
