## Section IV. Procedure

### IV.1) Description

#### IV.1.1) Type of procedure

Negotiated procedure without publication of a contract notice

- The products involved are manufactured purely for the purpose of research, experiment, study or development
- The works, supplies or services can be provided only by a particular economic operator for the following reason:
  - absence of competition for technical reasons

Explanation:

S2117 is a software tool that is used to assess the impact of tactical active sonar deployment and the potential harm to marine mammals. The new S2117 came into service in 2022 as an update to the previously outdated S2117 software and is used on various platforms within the Royal Navy. BAES are the Original Equipment Manufacturing (OEM) for this system software.

It is considered that the award of this contract without prior publication of a contract notice in the UK e-notification service (as required by the relevant legislation) is lawful in accordance Regulation 16 (1)(a)(ii) of the Defence and Security Public Contracts Regulations 2011) for technical reasons. BAE hold the expertise, technical knowhow and understanding of this specific capability, including a detailed technical understanding of how the key functional parts of the software should interact and knowledge of specific range readings between these key components. For these reasons, it is not considered that another provider could deliver the required level of technical support (e.g., defect resolution, software updates etc) to the software tool in its current design. A redesign of the current software would be strictly impractical on the grounds it would not meet the timescales required by the Authority and therefore contract obligations could not be met without introducing unacceptable technical risk to MOD capability.

#### IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No
