<https://in-tendhost.co.uk/westyorkshireca.aspx/Home>

I.4) Type of the contracting authority

Regional or local authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Public Transport Information System Maintenance and Development Services

II.1.2) Main CPV code

- 48000000 - Software package and information systems

II.1.3) Type of contract

Supplies

II.1.4) Short description

Combined Services and Assets (CoSA) system and database is a purpose-built database with Geographical Information System (GIS) functionality. CoSA enables the Combined Authority to manage public transport information used locally and nationally for approximately 17,000 bus stop and shelter assets, bus and taxi service procurement and home to school transport. There are currently c.100 registered users of CoSA at the Combined Authority. Members of the public interact with the data processed through CoSA via our Real Time system, journey planners, the national bus stop record (NaPTAN) and other national datasets.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £590,000

II.2) Description

II.2.2) Additional CPV code(s)

- 72000000 - IT services: consulting, software development, Internet and support

II.2.3) Place of performance

NUTS codes

- UKE - YORKSHIRE AND THE HUMBER

II.2.4) Description of the procurement

Combined Services and Assets (CoSA) system and database is a purpose-built database with Geographical Information System (GIS) functionality. CoSA enables the Combined Authority to manage public transport information used locally and nationally for approximately 17,000 bus stop and shelter assets, bus and taxi service procurement and home to school transport. There are currently c.100 registered users of CoSA at the Combined Authority. Members of the public interact with the data processed through CoSA via our Real Time system, journey planners, the national bus stop record (NaPTAN) and other national datasets.

II.2.11) Information about options

Options: No

II.2.14) Additional information

This contract provides a Combined Services and Assets (CoSA) system and database is a purpose-built database with Geographical Information System (GIS) functionality. CoSA enables the Combined Authority to manage public transport information used locally and nationally for approximately 17,000 bus stop and shelter assets, bus and taxi service procurement and home to school transport. There are currently c.100 registered users of CoSA at the Combined Authority. Members of the public interact with the data processed through CoSA via our Real Time system, journey planners, the national bus stop record (NaPTAN) and other national datasets.

This contract will allow the Combined Authority to bespoke develop the system, as we

believe the current supplier are the only organisation able to do this. This is to ensure that the system continues to deliver our imminent needs during this interim period whilst still maintaining support and maintenance for the system prior to a re-procurement. This contract award includes bespoke developments to assist in preparing data and functionality to be potentially moved to a new system following a procurement activity. The estimated length of time to carry out a specification design, procurement and extensive testing to successfully implement a working system without any interruption in service to the public is anticipated to be up to 3 years.

As a business-critical system continuity of service during any transfer between providers is essential. It is intended to procure a new provider. Due to the complexity of the numerous data inputs and outputs of the current system, it will be necessary to run any new and current system in parallel whilst a new system is being commissioned and implemented. Any new system will need to be compatible with third party applications used in the delivery of these services. To ensure service continuity, the West Yorkshire Combined Authority has taken the decision to award the Contract to current provider SYSTRA Limited, under Regulation 32 of the Procurement Regulations 2015 who we believe are the only company available in the market at this time capable of maintaining and supporting our bespoke system in its current form without service interruption.

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

This contract provides a Combined Services and Assets (CoSA) system and database is a purpose-built database with Geographical Information System (GIS) functionality. CoSA enables the Combined Authority to manage public transport information used locally and nationally for approximately 17,000 bus stop and shelter assets, bus and taxi service procurement and home to school transport. There are currently c.100 registered users of CoSA at the Combined Authority. Members of the public interact with the data processed through CoSA via our Real Time system, journey planners, the national bus stop record (NaPTAN) and other national datasets.

This contract will allow the Combined Authority to bespoke develop the system, as we

believe the current supplier are the only organisation able to do this. This is to ensure that the system continues to deliver our imminent needs during this interim period whilst still maintaining support and maintenance for the system prior to a re-procurement. This contract award includes bespoke developments to assist in preparing data and functionality to be potentially moved to a new system following a procurement activity. The estimated length of time to carry out a specification design, procurement and extensive testing to successfully implement a working system without any interruption in service to the public is anticipated to be up to 3 years.

As a business-critical system continuity of service during any transfer between providers is essential. It is intended to procure a new provider. Due to the complexity of the numerous data inputs and outputs of the current system, it will be necessary to run any new and current system in parallel whilst a new system is being commissioned and implemented. Any new system will need to be compatible with third party applications used in the delivery of these services. To ensure service continuity, the West Yorkshire Combined Authority has taken the decision to award the Contract to current provider SYSTRA Limited, under Regulation 32 of the Procurement Regulations 2015 who we believe are the only company available in the market at this time capable of maintaining and supporting our bespoke system in its current form without service interruption. Therefore competition is absent for technical reasons.
