Section I: Contracting authority

I.1) Name and addresses

NHS Blood & Transplant

North Bristol Park

Filton, Bristol

BS34 7QH

Email

marta.drozdowska@nhsbt.nhs.uk

Country

United Kingdom

NUTS code

UK - UNITED KINGDOM

Internet address(es)

Main address

www.nhsbt.nhs.uk

I.3) Communication

Additional information can be obtained from the above-mentioned address

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

RCI Manual and Automated Test Systems

Reference number

NHSBT1481

II.1.2) Main CPV code

- 38434520 - Blood analysers

II.1.3) Type of contract

Supplies

II.1.4) Short description

Please see part II.2.4 for detailed description of the procurement

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 33140000 - Medical consumables
- 33696100 - Blood-grouping reagents
- 33696200 - Blood-testing reagents
- 38434520 - Blood analysers
- 42931100 - Laboratory centrifuges and accessories
- 50421000 - Repair and maintenance services of medical equipment

II.2.3) Place of performance

NUTS codes

- UK - UNITED KINGDOM

II.2.4) Description of the procurement

Please note this is NOT the start of a procurement process. A separate contract notice will be published to cover this requirement.

Prior to commencing the formal procurement process, and to help inform our strategy, NHSBT would like to consult the market to improve our knowledge of all current offers available in the market place, identify further opportunities and potential issues, as well as gauge market interest in the proposed service.

Red Cell Immunohaematology (RCI) is a specialist function within the Clinical Services Directorate of NHS Blood and Transplant (NHSBT). The RCI Laboratories provide antibody resolution and red cell phenotyping on samples referred from Hospital Transfusion Laboratories and other Laboratories within NHSBT. Reference services are provided from Barnsley, Birmingham, Colindale, Filton (Bristol), Liverpool, Newcastle, and Tooting.

NHSBT is seeking to engage with suppliers on the market who can provide a system to

support, as a minimum, manual and automated blood grouping (ABO, Rh D, C, c, E, e, K), antibody screening and identification, consistent with the workload and case mix of RCI laboratories. RCI would expect to be able to undertake trials of the system on NHSBT premises. The test system is required to identify, sample, dispense and test blood samples and include all items required to analyse, interpret, transmit and store results on those tests. Automated testing is required for simpler high-volume tests, manual testing is required for low volume complex tests. It is a requirement that the system is compatible with NHSBT Reagents, and would meet regulatory requirements in the UK for the duration of its use.

Information gained from this exercise will be used to inform production of a detailed specification and subsequent advertisement through the FTS route. Interested organisations are requested to send an expression of interest via email to

Marta.Drozdowska@nhsbt.nhs.uk by no later than 17:00 hrs (GMT) on 9th February 2021.

If you do not respond by this date you aren't excluded from taking part in the forthcoming tender, this date is to allow for supplier engagement to be organised.

Further information (e.g. the draft technical specification, award criteria, timescales etc) may be released, for consultation purposes only, to organisations who express an interest.

Please note that all details are subject to change.

II.3) Estimated date of publication of contract notice

15 June 2021

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes
