II.2.14) Additional information

Provision of AMR System package including the provision of new AMR hardware, energy management software and replacement of existing AMR hardware where applicable across Northern Ireland's central government and associated arms' length bodies. This will also include ongoing support and maintenance of the Clients' AMR System post installation. The Strategic Investment Board SIB are intending to develop a call off contract for the installation of Automatic Meter Reading AMR systems. This will allow departments and ALBs to install energy and water metering along with the energy data management software, under a single contract, at sites of their choosing and at times of their choosing within the contract period. It is important to note that while all organisations have indicated a strong desire to avail of the contract, it is not possible to accurately predict the number of systems that will eventually be installed as it will depend on available funding. Indeed this contract does not make any guarantees on the number of systems to be installed. Therefore for illustrative pricing purposes a notional number of 250 systems has been included within the pricing schedule. In the event that Clients require significantly more systems installed than indicated in the pricing schedule, the scope of this 4 / 8 EN Standard form 2 - Contract notice contract will allow expenditure up to £2,000,000. This Contract shall be a 5 year initial term for system installations, with an option to extend for 1 year for data hosting and web portal access.
