II.2.4) Description of the procurement

NHS England is undertaking a competitive procurement to replace its existing COVID-19 Data Platform with a data platform for NHS England and NHS bodies.

Services will be provided under the contract for FDP-AS to NHS bodies (as defined in the National Health Service Act 2006) and other providers of NHS-funded services (in relation to the provision of those services), as well as NHS England.

The data platform will be a cloud-based Software as a Service (SaaS) Solution, which will enable the use and sharing of data using a safe and secure environment.

NHS England are not mandating use of the data platform. It will be of benefit for Trusts and ICSs to use the data platform to support Use Cases they wish to adopt. Local Trusts and ICS's will have the autonomy to use the data platform to address their own key challenges and priorities. De-identified data will only flow to central platforms for specific, necessary and pre-agreed planning purposes (such as national reporting on vaccine uptake, to increase supply chain efficiency or to create benchmarks of good practice that can inform national policy) and in compliance with information governance principles and data protection law.

The key features of this requirement are:

1. Platform: We are buying a platform that will be run as a SaaS with some key Requirements which will have to be met
2. Service: The Successful Supplier will need to meet our robust performance measures and governance standards.
3. Customer base: FDP-AS will be delivered to NHS England and other NHS Bodies. Providers of NHS funded care may also use the platform.
4. Landscape: FDP-AS to fit within the wider NHS England environment and constraints.
5. Transition: needs to be successfully implemented to support a safe transition from the incumbent solution.
6. Implementation: will be based around Use Cases, as instructed by NHS England.
7. Behaviours: We require the Successful Supplier to meet our ways of working.
