### VI.3) Additional information

The contracting authority considers that this contract may be suitable for economic operators that are small or medium enterprises (SMEs). However, any selection of tenderers will be based solely on the criteria set out for the procurement.

This framework will be available for use by any entity within the same group of companies as NHG from time to time (the current list can be found at <https://www.nhq.org.uk/about-us/who-we-are/current-members-of-the-group/> and any entity or joint venture company that NHG or any other NHG Group Member holds an interest in from time to time. NHG may also (at its sole discretion) permit use of the framework by any other contracting authority that is a provider of social housing operating in the Greater London area. This includes providers of social housing including without limitation any Registered Provider (as defined in the Housing and Regeneration Act 2008 and registered with the Regulator of Social Housing), local authorities and/or Arm's-Length Management Organisations (ALMO). A list of the current Registered Providers can be found by visiting <https://www.gov.uk/government/publications/current-registered-providers-of-social-housing> Due to the increasing demand for additional housing across London this Framework may present a significant opportunity for the selected framework participants and these organisations.

Section IV.1.3) Continued -

Our rationale and justification for procuring a Framework for a longer period than four years in this case is as follows. We are of the view that the proposed framework length and option to extend beyond four years in this case is justified as comprising an “exceptional case” for the purposes of Regulation 33(3) of the PCRs 2015:

1 - In the coming years, there will be significant changes to law and regulations for fire and building safety in the construction and housing management sectors. Future legal requirements are not currently fully known, and we expect that the requirements and compliance methods will develop and evolve over a period of several years. It is therefore critical to NHG that we can build and maintain strong relationships with the members of this framework, in order to work together to meet the challenges ahead, and work in a spirit of collaboration and continual improvement through this period of regulatory uncertainty, change and upheaval. We expect this period to exceed the standard four-year term for frameworks under the Public Contracts Regulations 2015.

2 - NHG is working towards a target of meeting EPC-C by 2030 and we believe that it is therefore critical to NHG that we can build and maintain strong relationships with the members of this framework, in order to work together to meet the challenges ahead, and work in a spirit of collaboration and continual improvement through this period of regulatory uncertainty, change and upheaval. We expect this period to exceed the standard four-year term for frameworks under the Public Contracts Regulations 2015.

3 - NHG are aiming to have completed all works related to combustible materials to external wall systems by 2030. NHG require an extended framework length to ensure we have the timescale to deliver this.

4 - NHG are setting out a new approach to delivering long term social value through the framework and believe that a long-term partnering approach is the only way to achieve this.
