II.1.3) Type of contract

Services

II.1.4) Short description

Buckinghamshire Council is working in partnership with the Clinical Commissioning Group and the wider health and social care system to sustain and continue the development of a robust Discharge to Assess (D2A) pathway through the commissioning of Home care packages and care home placements.

Discharge to Assess is a pathway which has been successful in reducing acute bed

occupancy. It is designed to be a nimble process that facilitates rapid discharge from hospital of medically optimised individuals, enabling acute and community hospitals to maintain capacity and respond to pressures, whether seasonal or due to the demands of Covid-19. This pathway enables assessments of long term needs to take place in a setting that is less restrictive than hospital, ensuring longer term packages of care and support are reflective of the person's maximum abilities. Some people may require this support for a period of up to a maximum of 6 weeks depending on the assessment.

Our philosophy in Buckinghamshire is Home First. Whilst most people will be discharged home without the need for any extra funded support, some will have care and support needs that require D2A Home care Providers. This will provide care and support at home whilst social care needs assessments, and occasionally NHS Continuing Healthcare Assessments of eligibility, are undertaken in a community setting. It is expected that Home care providers will accept D2A service users that are Covid-19 positive but have been asymptomatic for 48 hours and also those that are post 14 days isolation and Covid-19 recovered.

If discharge home is not possible due to safety or client need, a care home placement may be considered.
