Description

There is a requirement to remediate the floor of an existing building to achieve a uniform and level surface, using an epoxy resin, such that it is suitable for use by a large, Powered Pallet Truck (PPT). The self-levelling epoxy resin surfacing is to be capable of resisting repeated usage by the PPT and bearing pressures beneath its wheels of 15N/mm². It is anticipated that the existing floor surface will need to be reduced in height in some areas and filled in other areas in order to achieve the target level agreed in the contract.
