Planning

Repository Development (RD) Southern Trench Cap Interim Membrane Replacement (STIM)

LLW Repository Ltd trading as Nuclear Waste Services

F01: Prior information notice Prior information only Notice identifier: 2023/S 000-001208 Procurement identifier (OCID): ocds-h6vhtk-03979d Published 16 January 2023, 9:23am

Section I: Contracting authority

I.1) Name and addresses

LLW Repository Ltd trading as Nuclear Waste Services

Pelham House

Calder Bridge

CA20 1DB

Contact

Charlene Bainbridge

Email

Charlene.Bainbridge@llwrsite.com

Country

United Kingdom

Region code

UKD1 - Cumbria

National registration number

5608448

Internet address(es)

Main address

https://www.gov.uk/government/organisations/nuclear-waste-services/about

Buyer's address

https://www.gov.uk/government/organisations/nuclear-waste-services/about

I.3) Communication

Additional information can be obtained from the above-mentioned address

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Other activity

Nuclear Decommissioning

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Repository Development (RD) Southern Trench Cap Interim Membrane Replacement (STIM)

II.1.2) Main CPV code

• 45000000 - Construction work

II.1.3) Type of contract

Works

II.1.4) Short description

Nuclear Waste Services (NWS) is a joint trading name of both LLW Repository Limited (LLWR) and Radioactive Waste Management Limited (RWM). NWS is a division of the Nuclear Decommissioning Authority (NDA) which includes RWM and LLWR. NWS is not a legal entity but provides strategic oversight over the operation and development of these businesses through a management board governance structure.

NWS is proceeding with significant civil engineering activities to fill and make safe a waste disposal area for the long-term environmental protection. These activities form the Repository Development portfolio and are based at the LLW Repository facility near Drigg Village in Cumbria, England.

II.1.5) Estimated total value

Value excluding VAT: £45,000,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 45000000 Construction work
- 71000000 Architectural, construction, engineering and inspection services

- 44900000 Stone for construction, limestone, gypsum and slate
- 45112000 Excavating and earthmoving work
- 45112500 Earthmoving work
- 45500000 Hire of construction and civil engineering machinery and equipment with operator
- 45112300 Infill and land-reclamation work
- 45112310 Infill work
- 45112360 Land rehabilitation work
- 45200000 Works for complete or part construction and civil engineering work
- 45112600 Cut and fill
- 45220000 Engineering works and construction works
- 45222000 Construction work for engineering works except bridges, tunnels, shafts and subways

II.2.3) Place of performance

NUTS codes

UKD11 - West Cumbria

Main site or place of performance

Calderbridge

II.2.4) Description of the procurement

Repository Development is a long-term portfolio of works that will provide disposal capacity and protection of low-level nuclear waste over the next 107 years, or until the end life of the Repository Site. In the shorter term the portfolio, over the next 15 years will install closure engineering works for short and long-term environmental protection for wastes currently disposed in Vault 8 and the adjacent trenches. This scope of works has been previously referred to as Repository Development Programme – Tranche 1 Main Civils and has been communicated to the market in early 2022.

The works over the next 15 years have been considered, and optimised detailed designs completed. More recently, the delivery strategy for the works has been further developed and subsequently split into projects that deliver a key benefit to the closure of Vault 8 and adjacent trenches. NWS are now looking at the route to market for the Southern Trench Cap Interim Membrane Replacement Project (STIM).

The new procurement is seeking to mobilise a competent civils contractor to be mobilised by the end of March 2024. This may be placed as a standalone contract or as a contract placed under a Framework arrangement.

This procurement is required to enable delivery of the South Trench Cap Membrane Replacement Package for Repository Development within the Waste Operations Portfolio.

The estimated value for completion of STIM is £35 - 45million.

NWS is currently seeking feedback on the potential public frameworks that may be suitable for the procurement. The route to market decision will be based on market feedback and the ongoing development of the NWS procurement documents.

Organisations are invited to submit responses via NWS's ATAMIS system to the "Lines of Enquiry" set out in Appendix A of "NWS - Repository Development PIN Jan 2023" which can be accessed against Record Ref C12321 once logged into Atamis <u>https://one-nda.force.com/s/Welcome</u>.

II.3) Estimated date of publication of contract notice

31 August 2023

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes
