I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Other activity

Research & Development

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Plant Resilience Chiller

Reference number

DN651595

II.1.2) Main CPV code

- 42500000 - Cooling and ventilation equipment

II.1.3) Type of contract

Supplies

II.1.4) Short description

A new single chiller is required to serve a back-up to an existing Daikin chiller. The system serves the building 1 °C cooling coils located within 9 No. Dehumidifiers that maintain a set dew-point within existing clean & dry rooms.

The current 1°C chiller circuit is supplied by a single chiller. This circuit supplies the 9 dehumidifier units which serve the cell assembly rooms to achieve the target dew point for this area. The single chiller does not have any back up unit or resilience to prevent the room conditions from being compromised. The requirement of this document is to implement a resilience chiller which will supply chilled water in the event of a failure on the current system and not provide additional capacity to the circuit. The system already has provision to install an additional chiller in parallel to the current asset.

Please register your interest in the link below, the tender documents will be viewable once expression of interest has been accepted.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 45331000 - Heating, ventilation and air-conditioning installation work

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

All the Mechanical and Electrical Services are being tendered on a performance basis for this project. The Contractor shall be responsible for the full adoption of the design concepts and principles provided, detailed design, installation and commissioning of all necessary building services to suit the building layouts and passive fabric principles. The Performance Specification details the design standards that shall be adhered to in the development of the design of the building services, including all passive measures set out by the Client's team for the project. The performance specification should not be taken as being exhaustive, but it is indicative of the quality and standards required for the project. Note that the drawings issued with the tender are to illustrate the design concepts and principles to be fully adopted and developed into a fully detailed design at the start of the contract period prior to any services being installed on site.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

End date

16 October 2023

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Open procedure

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

IV.2) Administrative information

IV.2.2) Time limit for receipt of tenders or requests to participate

Date

28 February 2023

Local time

12:00pm

IV.2.4) Languages in which tenders or requests to participate may be submitted

English

IV.2.7) Conditions for opening of tenders

Date

28 February 2023

Local time

12:00pm

Section VI. Complementary information

VI.1) Information about recurrence

This is a recurrent procurement: No

VI.4) Procedures for review

VI.4.1) Review body
