II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £50,000,000

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Smart Environmental Regulation Programme (SERP) will transform digital and IT capabilities for regulatory activities within Defra and its ALBs. The programme combines 4 programmes:

Regulatory Services Programme - Environment Agency

Waste Tracking - DEFRA Programme

Collection & Packaging Reforms - DEFRA Programme

Environment Monitoring & Planning Programme - DEFRA Programme

Across the group there are many legacy systems that underpin these activities that need replacing, as well as new statutory requirements, as outlined in the Environment Act 2021, that need implementing. Historically, there has been a disparate approach to Service and Platform development. However, across the digital programmes, there is an opportunity to develop generic digital capabilities that can be re-used to enable a more consistent technical

architecture, efficient and quicker means of delivery.

Generic platforms can include the determination and management of permit and registrations, charging, compliance, enforcement, data storage and analytics, as well as externally facing digital services for the ability to manage online accounts, to apply, submit returns and tracking data online.

As different programmes are at different stages of development, with some in Beta/Live, others in Discovery, Defra is keen to work collaboratively with a provider to shape Statements of Work to implement capabilities.

Defra was seeking to partner with a Microsoft Gold build partner to configure Power Platform & Azure technologies with experience in the delivery of:

- o Power platform & Azure based developments, integrations & migrations
- o Power Portal implementations with GDS approvals in place
- o Azure Data Services including AI based analytics.

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: Yes

Description of options

Two year contract period with a six month optional extension period only.

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

The Procurement was competed via the Crown Commercial Service RM1043.7 Digital Outcomes and Specialists 5 Framework Agreement, therefore prior publication was not required as Government Framework Agreement was used. There was not an option on this system that allowed us to select 'Government Framework' call-off as the 'Type of Procedure'.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

Section V. Award of contract

Contract No

ecm_66498

Title

Project 35629 Smart Environmental Regulation Programme (SERP) Contract

A contract/lot is awarded: Yes
