#### **II.2.4) Description of the procurement**

The annual Stocking Density assessment (SDA) is carried out as an audit, to ensure adequate numbers of trees are present on each restock site. This assessment is carried out for young crops -up to the age of 5- to ascertain numbers of live trees per hectare, plantable gaps with a subjective assessment of the reasons for the tree losses.

The assessment may be carried out on a representative sample of the site through circular field plots or by counting all trees on the site by classifying images that are obtained through remote sensing.
