Supplies

II.1.4) Short description

The Single Trade Window Programme is a multi-year Programme and a key enabler of the technological and data integration delivery required to deliver the UK's published 2025 Border Strategy, which sets out the UK's ambition to have the most effective border in the world by 2025.

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The Single Trade Window Programme is a multi-year Programme and a key enabler of the technological and data integration delivery required to deliver the UK's published 2025 Border Strategy, which sets out the UK's ambition to have the most effective border in the world by 2025.

II.2.14) Additional information

Currently a business seeking to trade through the UK Border - whether importing or exporting - needs to interact with a number of Government Departments through separate processes, often asking for the same information. The Single Trade Window will provide a single gateway for businesses to complete their import, export and transit obligations at the border, submitting information once and in one place. It will not replace the back-end systems operated by individual Government Departments but deliver the technology and structure that shares information with these systems, maintaining each individual Department's independence when processing the required data. The STW will benefit traders by:

- Rationalising data requirements by only asking for any piece of information once
- Providing a single point of access and consolidated communication both from and to the trader
- Offer easy to use guidance that puts the trade at the centre of what the customer needs to do

In addition to Trader benefits the STW will provide support HMG by:

- Eliminating data errors and inconsistencies by only asking for each piece of information once
- Sharing data between consuming systems in real time, to facilitate earlier analysis for risking improving the flow of goods through the border and enabling better targeted intervention.

The Single Trade Window Programme has developed its strategic business case and a cross-HMG approach, reflecting the numerous Departments that interact with the UK Border, and is listed on the Infrastructure and Projects Authority (IPA) register of Government Major Projects Portfolio (GMPP). Following the Spending Review 2021 (SR21) process, the Programme is now taking forward its plans for delivering its ambitious but transformational agenda. Over the course of its lifecycle, the Programme will need to deliver:

? Services that offer an outstanding transactional experience for customers when they submit information on border transactions, including tailored support, guidance and visibility of the progress of their submissions and goods

? Functionality that enables data to be quickly, accurately and safely shared across organisations, and is capable of being analysed and presented in different ways depending on the specific needs of the user

Following the Spending Review 2021 (SR21) process, the Programme is now taking forward its plans for delivering its ambitious but transformational agenda. The Programme is at an early stage of developing its commercial model and would like to offer interested suppliers the opportunity to learn more about the plans for the UK Single Trade Window and potential opportunities for further collaboration.

Suppliers who wish to express an interest and be included in the Single Trade Window's early engagement activity must ensure they are pre-registered on the HMRC SAP Ariba e-sourcing portal.

The initial engagement event will take place on Friday 28 January 2022 between 1100-1230hrs GMT, the Programme will issue invitations to a virtual session.

The guidance for the HMRC SAP Ariba e-sourcing portal registration process is also attached to this notice.

If you are already registered on the SAP Ariba e-Sourcing portal please email the contact named in this notice with your AN registration number.

If not already registered, you will be provided with a SAP Ariba AN registration number.

All registered suppliers will be granted access to information within the Ariba Portal and be eligible to select to be invited to subsequent information sharing events.

HMRC will use SAP Ariba to manage interest in the Single Trade Window and notify suppliers of subsequent engagement events once further dates have been confirmed,

There is no need to do anything other than register/express interest at this stage and confirm attendees.

II.3) Estimated date of publication of contract notice

1 December 2023

Section IV. Procedure

IV.1) Description

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No
