The duration of the contract has 2 alternatives which are:

* 7 year contract + 3 year possible extensions

Price Evaluations: The scoring is carried out within an Excel spread sheet outside of the e-tender system.

The equations used outside of the system to reach the score between 0 – 5 are as follows: (for purposes of

explanation, the outcome of each calculation is show below as sum A, sum B, etc.)

Stage 1

All price bids are compared against lowest bid to reach percentage difference from lowest bid.

Equation: $\text{price bid} - \text{lowest bid} / \text{lowest bid} * 100 = \text{Sum A}$

Stage 2

Sum A is then shown as % different from 100

Equation: $100 - \text{Sum A} = \text{Sum B}$

Stage 3

Sum B is then divided by 100 to show it as a figure

Equation: $\text{Sum B} / 100 = \text{Sum C}$

Stage 4

Sum C is then multiplied by the maximum score of 5 to reach the final score

Equation: $\text{Sum C} * 5$

The final score is then entered into the Score Card and will be within 2 x decimal places, e.g., 3.50.

No minus scores can be entered into the Score Card therefore any minus scores will be entered as 0.

As this tender is being offered on an Alternative A or Alternative B basis the price evaluation will be undertaken

for each option so that the overall best value tender can be identified by combining these price evaluations with

the quality evaluation.
