## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

Collation and Analysis of Weather Impacts from Social Media 2022 - 2024

Reference number

DN589873

#### **II.1.2) Main CPV code**

- 72000000 - IT services: consulting, software development, Internet and support

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

The Met Office and Flood Forecasting Centre (FFC) require access to filtered, relevant and geolocated impact information in near real time during weather events. This is to support operational situational awareness, real-time forecast modification and to support post event verification of the National Severe Weather Warning Service and the Flood Guidance Statement.

Impacts are often reported on social media and the ability to obtain this information quickly, consistently and with minimal noise is becoming increasingly important. This is because there is an increased expectation for the Met Office and FFC to have a detailed awareness of impacts as they happen, and the collation of higher quality and quantity impact information improves the confidence in the assessment of the skill of our forecasts.

This project will procure an operational tool that collates, filters and geo-locates near real-time impact information to support operational forecasts and verification. This will support the Met Office corporate vision to be recognised as global leaders in weather and climate science, given this is a nascent and emerging technology that we will be among the first to develop and use. It will also support our anchor of improving the skill and verification of our 0–2-hour forecasts (nowcasts) as well as exploiting this particular branch of data science.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

## **II.2) Description**

### **II.2.2) Additional CPV code(s)**

- 48000000 - Software package and information systems

### **II.2.3) Place of performance**

NUTS codes

- UK - United Kingdom

### **II.2.4) Description of the procurement**

The Met Office and Flood Forecasting Centre (FFC) require access to filtered, relevant and geolocated impact information in near real time during weather events. This is to support operational situational awareness, real-time forecast modification and to support post event verification of the National Severe Weather Warning Service and the Flood Guidance Statement.

Impacts are often reported on social media and the ability to obtain this information quickly, consistently and with minimal noise is becoming increasingly important. This is because there is an increased expectation for the Met Office and FFC to have a detailed awareness of impacts as they happen, and the collation of higher quality and quantity impact information improves the confidence in the assessment of the skill of our forecasts.

This project will procure an operational tool that collates, filters and geo-locates near real-time impact information to support operational forecasts and verification. This will support the Met Office corporate vision to be recognised as global leaders in weather and climate science, given this is a nascent and emerging technology that we will be among the first to develop and use. It will also support our anchor of improving the skill and verification of our 0–2-hour forecasts (nowcasts) as well as exploiting this particular branch of data science.

### **II.2.5) Award criteria**

Price is not the only award criterion and all criteria are stated only in the procurement documents

### **II.2.7) Duration of the contract, framework agreement or dynamic purchasing system**

Duration in months

24

This contract is subject to renewal

No

**II.2.10) Information about variants**

Variants will be accepted: No

**II.2.11) Information about options**

Options: No

**II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.1) Type of procedure**

Open procedure

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: Yes

### **IV.2) Administrative information**

#### **IV.2.2) Time limit for receipt of tenders or requests to participate**

Date

25 February 2022

Local time

2:00pm

#### **IV.2.4) Languages in which tenders or requests to participate may be submitted**

English

#### **IV.2.7) Conditions for opening of tenders**

Date

25 February 2022

Local time

2:00pm

---

## **Section VI. Complementary information**

### **VI.1) Information about recurrence**

This is a recurrent procurement: No

### **VI.4) Procedures for review**

#### **VI.4.1) Review body**
