Contract

## **Portable Low-Field MRI System**

Kent and Medway NHS and Social Care Partnership Trust

F03: Contract award notice

Notice identifier: 2024/S 000-002342

Procurement identifier (OCID): ocds-h6vhtk-0422f1

Published 23 January 2024, 6:35pm

### **Section I: Contracting authority**

#### **I.1) Name and addresses**

Kent and Medway NHS and Social Care Partnership Trust

Unit D, New Hythe Business Park, Magnitude House, New Hythe Lane

Aylesford

ME20 6WT

#### **Contact**

Jo Newton-Smith

#### **Email**

**I.4) Type of the contracting authority**

Body governed by public law

**I.5) Main activity**

Health

---

**Section II: Object****II.1) Scope of the procurement****II.1.1) Title**

Portable Low-Field MRI System

**II.1.2) Main CPV code**

- 33113000 - Magnetic resonance imaging equipment

**II.1.3) Type of contract**

Supplies

#### **II.1.4) Short description**

Kent and Medway NHS and Social Care Partnership Trust has awarded a contract via a negotiated procedure without prior publication for the provision of a portable low-field (0.064 Tesla) magnetic resonance imaging (MRI) system. The contract will also include associated peripherals, training, support and maintenance services for a period of five (5) years.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

#### **II.1.7) Total value of the procurement (excluding VAT)**

Value excluding VAT: £280,000

### **II.2) Description**

#### **II.2.2) Additional CPV code(s)**

- 33113100 - Magnetic resonance scanners

#### **II.2.3) Place of performance**

NUTS codes

- UKJ4 - Kent

#### **II.2.4) Description of the procurement**

Kent and Medway NHS and Social Care Partnership Trust (the "Trust") has awarded a contract for the provision of a portable low-field (0.064 Tesla) magnetic resonance imaging (MRI) system. The contract will also include associated peripherals, training, support and maintenance services for a period of five (5) years commencing on the date of delivery of the products to the agreed final shipping location.

The MRI scanner will be used for the purpose of accelerating and developing local place-based neuroimaging research into the process of assessment and diagnosis of dementia, in which timely access to neuroimaging is frequently a rate-limiting step. The scanner will also be available for researchers addressing other mental health disorders, such as research aligned to the new Kent Complex Psychosis Service and investigation of non-dementia mental illness in older and younger adults.

A key focus will be to aid the development of new AI algorithms in the assessment of structural change in dementia and cognitive decline – to decrease the need for high field MRI brain assessment in specialist centres and avoid the associated restrictive environment.

In order to support the its research objectives, the Trust required a system which fulfilled the following requirements:

- Approved for commercial sale in the UK (UKCA marked);
- Small and highly portable design in order to fit through doorways and elevators, and to provide ease of manoeuvrability;
- Magnetic configuration to enable researchers to work safely with participants during testing;
- Ability to be powered through standard electrical outlets;
- Low power consumption to reduce running costs;
- Open design to reduce participant anxiety; and
- Controlled through portable user-friendly wireless device (e.g. tablet).

## **II.2.5) Award criteria**

Cost criterion - Name: Value for Money / Weighting: N/A

## **II.2.11) Information about options**

Options: No

## **II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

## **II.2.14) Additional information**

The Trust considers that the award of the contract without prior publication of a contract notice was permitted by Part 2 of the Public Contract Regulations 2015.

The Trust published a voluntary ex ante transparency notice (2023/S 000-036285) on 8th December 2023, expressing its intention to award a contract via a negotiated procedure without prior publication.

Prior to the award of contract, the Trust observed a standstill period of at least 10 days following the publication of the voluntary ex ante transparency notice (2023/S 000-036285), beginning with the day after the date on which the notice was published.

---

## Section IV. Procedure

### IV.1) Description

#### IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The products involved are manufactured purely for the purpose of research, experiment, study or development
- The services can be provided only by a particular economic operator for the following reason:
  - absence of competition for technical reasons

Explanation:

It is considered that the award of the contract following a negotiated procedure without prior publication is lawful in accordance with regulation(s) 32(5)(a) of the Public Contract Regulations 2015, whereby the portable low-field MRI system will be "manufactured purely for the purpose of research, experimentation, study or development, and shall not include quantity production to establish commercial viability or to recover research and development costs".

The portable low-field MRI scanner will be used for the purpose of accelerating and developing local place-based neuroimaging research into the process of assessment and diagnosis of dementia, in which timely access to neuroimaging is frequently a rate-limiting step. The scanner will also be available for researchers addressing other mental health disorders, such as research aligned to the new Kent Complex Psychosis Service and investigation of non-dementia mental illness in older and younger adults.

A key focus will be to aid the development of new AI algorithms in the assessment of structural change in dementia and cognitive decline – to decrease the need for high field MRI brain assessment in specialist centres and avoid the associated restrictive environment.

The portable low field scanner will therefore be used in clinical research in alignment with current NHS England priorities, including reducing time to diagnosis and increasing dementia diagnosis rates, and to the priorities of clinical services both nationwide and internationally.

The portable low field MRI scanner has previously been used for Clinical Research in the NHS, gaining Health Research Authority (HRA) and UK Ethics approvals:

- 12/LO/1247 – West London & GTAC Research Ethics Committee,
- 19/LO/1384 – City & East Research Ethics Committee.

It is also considered that the award of the contract following a negotiated procedure without prior publication is lawful in accordance with regulation(s) 32(2)(a)(ii) of the Public Contract Regulations 2015, whereby "competition is absent for technical reasons".

Following market research, the Trust is confident the required product and associated services are only capable of being provided by a single supplier. The Trust's guiding principles being the requirement for a portable low field MRI system most suitable for the acceleration and development of local place-based neuroimaging clinical research. This includes:

- Approved for commercial sale in the UK (UKCA marked);
- Small and highly portable design in order to fit through doorways and elevators, and to provide ease of manoeuvrability;
- Magnetic configuration to enable researchers to work safely with participants during testing;
- Ability to be powered through standard electrical outlets;
- Low power consumption to reduce running costs;
- Open design to reduce participant anxiety; and
- Controlled through portable user-friendly wireless device (e.g. tablet).

It is the Trust's belief that the awarded contractor was the only economic operator capable of supplying an existing product within the Trust's timescales, and which fulfils these requirements in order to support the Trust's objectives for undertaking local place-based neuroimaging clinical research.

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: Yes

### **IV.2) Administrative information**

#### **IV.2.1) Previous publication concerning this procedure**

Notice number: [2023/S 000-036285](#)

---

## **Section V. Award of contract**

A contract/lot is awarded: Yes

### **V.2) Award of contract**

#### **V.2.1) Date of conclusion of the contract**

22 December 2023

#### **V.2.2) Information about tenders**

Number of tenders received: 1

Number of tenders received from SMEs: 1

Number of tenders received from tenderers from non-EU Member States: 1

The contract has been awarded to a group of economic operators: No

#### **V.2.3) Name and address of the contractor**

Hyperfine Operations, Inc.

351 New Whitfield Street

Guilford

CT 06437

Email

[info@hyperfine.io](mailto:info@hyperfine.io)

Telephone
