II.2.4) Description of the procurement

The SAQD is a valuable resource for the Scottish Government, SEPA, local authorities and others with an interest in air quality, and contributes to the development and assessment of air quality policy and legislation in Scotland. It also supports central and local government and SEPA in undertaking their statutory responsibilities in relation to air quality at Scottish, UK and international levels. In addition, the database provides information which allows health professionals to assess, in near real-time, any health effects of, for example, air pollution episodes and, for longer term epidemiological studies. To ensure that the website is as comprehensive as possible, there are also prominent links to other sources of air quality data and information in Scotland such as the SEPA Scottish Pollution Release Inventory and the Low Emission Zones Scotland website.

The Scottish Government wishes to continue this work, and further develop and enhance the services provided through the SAQD, together with ensuring that it remains accessible and relevant to the widest possible range of users.

Community benefits are included in this requirement. For more information see:

<https://www.gov.scot/policies/public-sector-procurement/community-benefits-in-procurement/>

A summary of the expected community benefits has been provided as follows:

The tenderer must provide a Community Benefits proposal that is relevant to the subject matter of this contract and supports the Scottish Ministers' commitment to contributing to the social, economic & environmental well-being of the people of Scotland, as described in the specification.

Tenderers should not provide details of any existing initiatives they already undertake as part of their day-to-day business and the community benefits proposed must be generated specifically for and as a result of this contract.

Good answers will demonstrate to evaluators that the tenderer has a comprehensive understanding of the subject matter of this contract and how the proposed benefits will reflect the national outcomes described in the Specification.

Proposals can be innovative but must be tangible and measurable, so that they can be monitored and reported throughout the contract.
