Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Auchencrosh Synchronous Condenser Project

Reference number

2021/S 000-000806

II.1.2) Main CPV code

- 31200000 - Electricity distribution and control apparatus

II.1.3) Type of contract

Supplies

II.1.4) Short description

Moyle Interconnector Limited ("Moyle") is procuring an EPC contract to supply and install a synchronous condenser at its Auchencrosh site in South Ayrshire, Scotland. Moyle, a subsidiary of Mutual Energy Limited, owns and operates a 500MW HVDC electricity interconnector between the electricity networks of Northern Ireland and Scotland, which facilitates the trading of wholesale electricity between the Single Electricity Market in Ireland and Northern Ireland and the GB electricity market. Further details will be provided in the Pre-Qualification Questionnaire ("PQQ") and / or the Invitation to Tender ("ITT") documents.

Text

Description of procurement The scope of the Auchencrosh Synchronous Condenser project as further detailed and specified in the procurement documents includes all works necessary for the design, detailed design, engineering, procurement, manufacture, transportation; installation, construction, testing, commissioning and provision of: (a) a synchronous condenser with an option for additional inertia to be provided by a flywheel; (b) a transformer for the grid connection at 275kV; (c) a synchronising circuit breaker between the transformer and synchronous condenser; (d) equipment connecting the synchronous condenser, connection transformer and synchronising circuit breaker; (e) all other ancillaries (such as auxiliary supplies, control and protection equipment, switchgear, cooling equipment, pony motor or equivalent, communications systems) required for the operation of the synchronous condenser for the design life; (f) all civil works required at the Auchencrosh site, including enabling civil works associated with an additional 275kV connection bay (the connection equipment will be supplied and installed by others); (g) all required construction permits excluding the Employer's permits as further detailed in the procurement documents; (h) all required system studies and dynamic models required by the grid operator(s); (i) performance and compliance testing to meet the requirements of the Grid Code; (j) spares (both strategic and operational); (k) an option at Moyle Interconnector Limited's discretion for operation and maintenance services post taking over for a period consistent with the warranty period and / or extendable up to a further 5 years. Further details will be provided in the Pre-Qualification Questionnaire (PQQ) and / or the Invitation to Tender (ITT) documents. Currency details will be provided in the ITT documents. Grid connection works (excluding civil works) will be carried out by others under a separate contract. Further details of the scope are provided in the PQQ and ITT documents.
