II.1.4) Short description

Immingham Green Energy Terminal (IGET) will be a multi-user bulk liquid green energy terminal to support the import of green ammonia (NH3) to be converted to green hydrogen. This will assist with decarbonizing the UK's transport sector and the import of Carbon Dioxide (CO2) to facilitate carbon capture storage, both of which will assist ABP's transition towards Net Zero. The proposed terminal is to be operated by ABP as a common user facility, providing port capacity for multiple customers. The Proposed

Development would occupy an area of approximately 102.52 hectares. ABP is looking to appoint a lead contractor to undertake the design and build contract for the development of IGET at the Port of Immingham. ABP has undertaken a two-stage negotiated procurement process for the Scope identified in accordance with The Utilities Contracts Regulations 2016. The successful Applicant following the procurement process is Bouygues Travaux Publics.
