Description of options

The scope of the requirement is set out in two options as described below. The Airport will identify, through the Invitation to Dialogue, the single option which best meets its requirements, These requirements will be articulated in the Invitation to Dialogue document:-Option 1 – Cabin bag screening equipment (C3 and C1 machines), tray return system, body scanning equipment and ancillary equipment, if required as part of this procurement, as a single solution procured via a single framework agreement with a single supplierOption 2 - Cabin bag screening equipment (C3 and C1 machines) and tray return system as a single solution via a framework agreement with body scanning equipment supplied separately through a second framework agreement with a different supplier. If ancillary equipment is required as part of this procurement exercise this will be supplied by either supplier. That is to say:- Option 1 - Supplier A responsible for supplying a fully integrated passenger screening system utilising all necessary equipment to deliver best sector performance in processing passengers. This will include, but not exclusively, C3 and C1 machines, tray return system and body scanning equipment. Option 2 -Supplier A responsible for supplying the X-Ray and (C3 and C1 machines) and tray return system. Supplier B responsible for supplying body scanning equipment. If ancillary equipment is required as part of the scope of this procurement, then the dialogue will determine whether Supplier A or Supplier B provides this. All suppliers to be capable of delivering their components such that they can be fully integrated into a single system. All suppliers are expected to be capable of working in a collaborative manner with the client and the client's agents to facilitate a right first time approach to delivery and demonstrate how this will be achieved.
