On 2 April 2014 Government introduced its Government Security Classifications (GSC) scheme which replaced Government Protective Marking Scheme (GPMS). A key aspect is the reduction in the number of security classifications used. All bidders should make themselves aware of the changes as it may impact this requirement. This link provides information on the GSC at:

<https://www.gov.uk/government/publications/government-security-classifications>

Cyber Essentials is a mandatory requirement for Central Government contracts which involve handling personal information or provide certain ICT products/services. Government is taking steps to reduce the levels of cyber security risk in its supply chain through the Cyber Essentials scheme. The scheme defines a set of controls which, when implemented, will provide organisations with basic protection from the most prevalent forms of threat coming from the internet. To participate in this procurement, bidders must be able to demonstrate they comply with the technical requirements prescribed by Cyber Essentials, for services under and in connection with this procurement.

Please note:

All certificates issued prior to 1 April 2020 or before 30 June 2020 on the existing scheme are valid until 30 June 2021. This includes those issued by Accreditation Bodies other than IASME.

On 30 June 2021, any certificate issued under the old scheme will expire.

Refer to <https://www.ncsc.gov.uk/information/cyber-essentials-faqs> for more information.

CCS considers the Transfer of Undertakings (Protection of Employment) Regulations 2006 will not apply at framework level. We encourage bidders to take their own advice on whether TUPE is likely to apply, in particular circumstances of the call-off contract and carry out due diligence accordingly.

Some purchases under this framework agreement may have requirements that can be met under this framework agreement but the purchase of which may be exempt from the Procurement Regulations (as defined in Attachment 1 — About the framework within the Invitation to Tender documentation). In such cases, call-offs from this framework will be unregulated.

Purchases for the purposes of the Procurement Regulations, and the buyers may, at their discretion, modify the terms of the framework and any call-off contracts to reflect that buyer's specific needs.

Registering for access:

This procurement will be managed electronically via the eSourcing suite. This will be the route for sharing all information and communicating with bidders. If you have recently registered on the eSourcing suite for another CCS procurement you can use the same account for this new procurement. If not, you will first need to register your organisation on the portal.
