- 72000000 - IT services: consulting, software development, Internet and support

II.2.3) Place of performance

NUTS codes

- UK - UNITED KINGDOM

Main site or place of performance

Primarily in the UK

II.2.4) Description of the procurement

Crown Commercial Service, as the Authority, has put in place an agreement for the provision of Digital Capability for Health for use by NHS Digital and other public sector health and social care bodies for the provision of digital outcomes and supporting services. The agreement was developed with NHS Digital as the Operator, who requires

digital capability to meet specific needs of the health and social care sector.

NHS Digital requires suppliers to invest in understanding their specific organisational needs and to bespoke delivery of their services to meet requirements.

This framework has 12 suppliers with whom NHS Digital will develop strategic relationships over a period of time, to warrant up-front investment in framework level supplier agnostic competition, whilst maintaining effective and efficient competition at call-off. Building of closer strategic relationships will encourage the suppliers to improve and innovate on their delivery of services.

This will be achieved through ongoing collaborative partnership or supplier relationship management activities based on feedback from call-off contracts and MI reports.

Suppliers under the framework are required to provide the following Service Provisions:

DevOps Services - support for ongoing live services

Digital Definition Services - either separately or combined Extended Discovery and /or Alpha phases.

Build and Transition Services - either separately combining Beta phase and/or Retirement phases (including transition to Live). It is anticipated that Live will be covered by an appropriate competition for DevOps Services.

End-to-End Development Services - with the ability to combine the full set of agile phases of Discovery through to Live.

Data Management (and Similar) Services - primarily targeted at building, enhancing and maintaining data assets, migrating data from one system to another and analysis and reporting from such data assets.

Call-off competitions under this framework will follow NHS Digital's standard governance processes for their requirements. There is no direct award call-off in this agreement.

Typical digital development will follow Government Digital Service (GDS) life cycle: discovery, alpha, beta and so on, outlined in the government service design manual (<https://www.gov.uk/service-manual>).

Suppliers will deliver work using GDS agile methodologies.

The framework will address the evolving technical 'stacks' associated within the different pillars of NHS Digital, including:

Platforms and infrastructure

Product development

Data services

II.2.5) Award criteria

Quality criterion - Name: Quality / Weighting: 70

Price - Weighting: 30

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

II.2.14) Additional information

Section VI. Complementary information

VI.3) Additional information

The value provided in Section II.1.7 is only an estimate. We cannot guarantee to suppliers any business through this Commercial Agreement.

As part of this contract award notice the following can be accessed at:

- 3) Customer list

On 2.4.2014 Government introduced its Government Security Classifications (GSC) scheme which replaced Government Protective Marking Scheme (GPMS). A key aspect is the reduction in the number of security classifications used. All bidders were required to make themselves aware of the changes as it may impact this requirement. This link provides information on the GSC at:

<https://www.gov.uk/government/publications/government-security-classifications>

Cyber Essentials is a mandatory requirement for Central Government contracts which involve handling personal information or provide certain ICT products/services. Government is taking steps to reduce the levels of cyber security risk in its supply chain through the Cyber Essentials scheme. The scheme defines a set of controls which, when implemented, will provide organisations with basic protection from the most prevalent forms of threat coming from the internet. To participate in this procurement, bidders were required to demonstrate they comply with the technical requirements prescribed by Cyber Essentials, for services under and in connection with this procurement.
