II.2.4) Description of the procurement

To support the day to day operation of the Client's Laundry Production Equipment, a Contractor is required to carry out both planned and ad-hoc (e.g. reactive) engineering servicing and maintenance at the Nottingham City Hospital.

The objective is to ensure the Laundry Production Equipment is supported by qualified engineers and subsequently fit for the purpose of enabling the Client's staff to operate the equipment safely, efficiently and reliably.

The Contractor is expected to deliver full engineering services to cover planned preventive and reactive maintenance. Servicing the laundry equipment regularly ensures

wash results, optimises the client's chemical usage, reduces the likelihood of costly breakdown and increases the life of the machinery and equipment, mitigating having to buy a new machine due to lack of maintenance.

The Contractor will be required to utilise the Client's digital planned preventative maintenance (PPM) system to provide the service

VI.4.3) Review procedure

Precise information on deadline(s) for review procedures

Nottingham University Hospitals NHS Trust (The Client) incorporated a 10 calendar days standstill period at the point of information on the award of the contract, as communicated to Bidder.

The Public Contracts Regulations 2015 provide for aggrieved parties who have been harmed or are at risk of harm by breach of the rules to take legal action. Any such action must have been brought within the applicable limitation period. Where a contract had not been entered into, the Court may have ordered the setting aside of the award decision or order for any document to have been amended and may have awarded damages, made a declaration of ineffectiveness, ordered for a fine to be paid, and/or ordered the duration of the contract be shortened.

The purpose of the standstill period referred to above was to allow the parties to apply to the Courts to set aside the award decision before the contract is entered into.
