II.1) Scope of the procurement

II.1.1) Title

Waste Container and Associated Services Framework

Reference number

C16719

II.1.2) Main CPV code

- 90521500 - Packaging of radioactive waste

II.1.3) Type of contract

Services

II.1.4) Short description

LLW Repository Ltd trading as Nuclear Waste Services (NWS) is a UK nuclear waste management company that provides services to UK customers to treat and dispose of low level radioactive waste. On behalf of the UK's Nuclear Decommissioning Authority, we manage the national low level waste repository in West Cumbria and oversee a national low level waste programme to ensure that lower activity radioactive waste is managed effectively across the UK.

NWS has a scope of work to procure a 4-year framework agreement, divided into 4 lots, for the provision of waste containers and associated services on behalf of our customers. The proposed Framework may be accessed via NWS and will be for use by organisations that either currently hold, or may in future enter into, a Waste Services Contract with NWS. These organisations include private sector bodies, plus public sector bodies that fall into one or more of the categories stated in the Customer List document in Atamis.

Text

The Requirement is for the provision of a fit-for-purpose, cost effective service providing access to different waste container types (Containers, UN Drums, Soft Sided Packages, NOVAPAKS), and associated services for all NWS customers with a Waste Services Contract The procurement project will deliver a 4-year multi-lot framework agreement. The current estimated maximum spend through the overall framework is £14,700,000 GBP, although the framework is formally a zero-value agreement, with no spend guaranteed. The potential framework value is forecast to meet the demands of the joint waste management plans between NWS and its Customers, the delivery of a framework that meets customer requirements in terms of cost, quality and schedule is key to the success of the framework. The scope of the new framework is to undertake the following: Lot 1: Transportable ISO Freight Waste Containers (and associated equipment) Lot 2: Manufacturing UN Approved Transportable Waste Drums, design, supply and distribution of specific UN Approved drums for the transport of solid and liquid materials Lot 3: The supply and distribution of Soft Sided Packages (SSP's) for use as a single transport disposal package Lot 4: NOVAPAK spares and repairs - to manage and distribute a stock of strategic spares, provide capability to carry out repairs to the NOVAPAK fleet and provide a maintenance contingency for the NOVAPAK fleet
