II.1) Scope of the procurement

II.1.1) Title

LAN Services

Reference number

prj_9723

II.1.2) Main CPV code

- 72710000 - Local area network services

II.1.3) Type of contract

Services

II.1.4) Short description

The purpose of this Contract Notice is to inform the market of the opportunity for the provision of local area network (LAN) services.

The LAN services will securely connect the MoJ's devices within its circa 1000 sites to other networked devices and to the wide area network (WAN) service. The scope of the LAN services includes:

- Management of the MoJ's existing fixed LAN and wireless LAN infrastructure and any newly provisioned infrastructure as part of the Contract;
- Onboarding any existing standalone Wireless LAN infrastructure and integrate it with the fixed LAN as instructed by the MoJ;
- Deployment and maintenance of structured cabling and patching across the MoJ's sites; and
- Provision of call-off engineering services within the MoJ's local ICT rooms to support the delivery of the LAN Services.

The LAN service is categorised into two broad groups, the 'Soft LAN Services' and the 'Hard LAN Services':

1. The Soft LAN Services comprise the remote management (including monitoring, configuration, software upgrades etc.) of the LAN infrastructure. They include the provision and management of the fixed LAN services the wireless LAN services and the associated security services.

2. The Hard LAN Services comprise the set of services which require attendance at an MoJ site including the supply, installation, physical configuration and decommissioning of LAN infrastructure and devices and other activities such as conducting surveys, cabling

and patching and physical attendance at a MoJ site to maintain or repair the LAN infrastructure and devices.

In addition there are Service Management, Social Value and Security obligations which the Supplier must comply with in the delivery of the LAN Services.

It is the MoJ's intention, at an appropriate time during the contract, to insource the Soft LAN services. As a result, the contract will be structured to allow for easier transition to such an insourced arrangement. The current expectation is that the insourcing of the Soft LAN services will occur no earlier than the start of the third Contract Year.

The contract for LAN services will be entered into with MoJ. However, the services will be provided for the benefit not only of MoJ but also a range of service recipients (including a range of MoJ executive agencies, arms' length bodies, government companies and other entities to whom MoJ provides services).

The Contract will contain a list of the initial service recipients who are to benefit from the provision of LAN Services, as well as a list of Potential Service Recipients who may wish to be added to the list of Service Recipients during the term of the Contract.

The Procurement will be listed under "PQQ_321 – Evolve LAN Services - SQ" in the MoJ's eSourcing Platform

The estimated total value range of the Contract is between £70 million and £180 million. However, the estimated total contract value is approximately £150 million.

The actual value of the Contract will depend on a number of influencing factors including:

- a) the prices tendered by the successful Tenderer;
- b) whether any extension options are applied;
- c) the extent to which projects are commissioned;
- d) whether the Soft LAN Services are insourced during the lifetime of the Contract; and
- e) the volume of devices and the range of Service Recipients to be included in scope for support

II.1.5) Estimated total value

Value excluding VAT: £150,000,000
