II.1.4) Short description

The Health and Safety Executive (HSE) is the independent regulator of health and safety and has responsibility for regulating consumer gas safety in GB and does this largely through the Health and Safety at Work Act 1974 and the Gas Safety (Installation and Use) Regulations 1998 (GSIUR). A key component of the consumer gas safety regime is the Gas Safe Register, the official gas registration body for the United Kingdom, Isle of Man, Jersey and Guernsey, appointed by the relevant Health and Safety Authority for each area.

By law all gas engineers must be on the Gas Safe Register. Gas Safe Register deals with all aspects of the downstream gas industry covered by the following regulations:

- Great Britain: The Gas Safety (Installation and Use) Regulations 1998
- Northern Ireland: The Gas Safety (Installation & Use) Regulations (Northern Ireland) 2004

The regulations cover both piped natural gas and liquefied petroleum gas (LPG). The gas registration scheme is owned by HSE and exists to protect the public from unsafe gas work.

The current service concession agreement will end on the 31 March 2025 and HSE is seeking to put in place a new service concession agreement to operate the Gas Safe Register for a four (4) year and nine (9) month period beginning 1 April 2025. The provider will be required to undertake a number of tasks and, in doing so, protect and inform the public of the risks of unsafe and illegal gas work, and of other dangers such as carbon monoxide (CO).

The operation of the scheme will be ring-fenced from any other of the successful bidder's commercial and operational activities to prevent any conflict of interest on the part of the successful bidder.

There are currently around 80,014 gas businesses registered on the Gas Safe Register, with approximately 155,653 unique engineers, generating approximately £23m revenue per annum through registrations and notification fees for the concessionaire.
