I.4) Type of the contracting authority

Regional or local authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

The provision of a Residential Substance Use Medically Managed Detoxification Service

Reference number

DN509399

II.1.2) Main CPV code

- 85000000 - Health and social work services

II.1.3) Type of contract

Services

II.1.4) Short description

The purpose of the residential medically managed detoxification service is to provide a safe, evidence based, effective detoxification and stabilisation programme to aid the recovery and reintegration of substance misusers with complex needs.

Within Sefton Integrated Substance Misuse Treatment Service, the first-line detoxification offer is community detoxification within the adult treatment service. Where increased risk is indicated, residential in-patient detoxification may be the safest and most effective treatment plan. Medical input and supervision can be provided by a community GP overseeing the detoxification plan.

However, medically managed inpatient detoxification is an important treatment option for service users who:

- Have not benefited from previous formal community-based and/or medically supervised inpatient detoxification
- Need 24 hour specialist substance misuse medical and/or nursing care because of significant co-morbid physical or mental health problems

-

Require complex polydrug detoxification, for example concurrent detoxification from alcohol or benzodiazepines

-

Are experiencing significant vulnerabilities or social problems that will limit the benefit of community-based detoxification

-

Have complex needs that require admission for medical stabilisation.

The particular aims of the service are

-

To provide a safe period of medically managed and monitored (by exception) withdrawal and detoxification, with 24 hour medical supervision

-

To encourage, educate, motivate and enable realistic lifestyle changes

-

To ensure that treatment gains are maintained by developing robust links with aftercare support available within the community, including mental health services

-

To address the safeguarding and welfare needs of vulnerable adult service users or the children of substance misusing parents, ensuring that needs are identified and planned for prior to a person's discharge from inpatient care

-

To ensure that the principles of harm minimisation underpin the delivery of all interventions in order to reduce the harm caused by drugs and alcohol on individuals, thereby contributing to a reduction in drug and alcohol related deaths and the transmission of blood borne viruses.

This procurement is being undertaken in accordance with section 7 of the Public

Contracts Regulations 2015, also known as the "Light Touch" regime under the EU Procurement Directives.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Lowest offer: £1,951,000 / Highest offer: £3,000,000 taken into consideration

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKD - NORTH WEST (ENGLAND)
