Main site or place of performance

Greater Manchester

II.2.4) Description of the procurement

Lot 1 – Financial Management Software

This lot is for the provision of a range of software for the purpose of Financial Management Solutions including but not limited to the following aspects of supply as required by members:

- Financial Management Software ensuring usability and accessibility is embedded within the software

- Accurate and reliable financial data processing and reporting
- Provision for general ledger, forecasting/budgeting, raising of purchase orders and a fully integrated fixed asset module if required by members
- e-Procurement: electronic ordering with the ability to authorise, issue orders by email and confirm goods received electronically
- Associated financial management modules and or tools, including but not limited to planning / budgeting / analytics for financial requirements
- Facility to analyse, and report, at sub-account level, for project accounting and cross Member activity
- Proven monthly/annual close down accounting processes in line with best practice
- “Workflow” flexibilities to include but not limited to absence management procedures
- “Self-serve” transactional processes fully automated to include but not limited to, raising/processing sales invoice requests, departmental budget recharges, procurement card transaction logs, adding new suppliers, direct debit mandates, expenses input/authorisation
- Potential for supporting shared service offer for other organisations if required by members
- Fully compatible and automated interface with other systems as required by members, which may include but are not limited to the following:
 - BACS
 - HR Software
 - Payroll Software
 - Management Information Services / Student Records Systems
 - Customer Relationship Management
 - Commitment reporting, in a format understandable to users
 - Simple to use integrated report writer capable of enabling users to produce and store high quality and visually presentable reports and allow the management accounts to be produced to a professional standard/layout

- A facility to drill down from standard management accounts
- The ability to store scanned images of prime documents such as purchase invoices and sales invoices which will enable users to manage their budgets
- System security compliant with all current legislation and best practice including but not limited to two factor authentication, if required by members
- Secure storage and legal compliance of financial information and associated data
- Flexible coding structure, allowing changes in structures/coding to be made easily, including options for parent/subsidiary and multi company/currency, and ability to store several budgets and forecasts including but not limited to original budgets, revised budgets
- Flexible structure, allowing changes in organisational structures including but not limited to mergers of organisations
- The security maintenance of the system must satisfy requirements including but not limited to segregation of duties, however there is a need to maintain the flexibility required in a large complex organisation such as a multi academy trusts and not be overly burdensome in its administration for academies, schools, colleges or as appropriate
- Compliance with all required law and financial accounting and management best practice
- A facility to update/upgrade, allowing the member institutions to “future-proof” the system.
- Compatibility with Microsoft Office as standard to enable the uploading of journals, and download and manipulate/model information

Member requirements will vary dependant from simple off the shelf software through to bespoke systems. Requirements may include both on premise, cloud or hybrid cloud software solutions including any related products (including but not limited to hardware and consumables), mobile applications, and related services.

Related services are also included, please see ITT for further details.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

48

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

- The ability to store scanned images of prime documents
- System security compliant with all current legislation and best practice including but not limited to two factor authentication, if required by members
- The security maintenance of the system must satisfy requirements including but not limited to segregation of duties, however there is a need to maintain the flexibility required in a large complex organisation such as a multi academy trusts and not be overly burdensome in its administration for academies, schools, colleges or as appropriate
- Flexible structure, allowing changes in organisational structures to be made easily, including but not limited to mergers of organisations
- A facility to update/upgrade, allowing the member institutions to “future-proof” the system
- Compatibility with Microsoft Office as standard to enable the uploading of data, and download and manipulate/model information

Member requirements will vary dependant from simple off the shelf software through to bespoke systems. Requirements may include both on premise, cloud or hybrid cloud software solutions including any related products (including but not limited to hardware and consumables), mobile applications, and related services.

Related services will include but are not limited to software advice and recommendations, consultancy, legal advice and compliance, advice on potential solution offerings, handover from any existing providers, implementation and commissioning, integration with other systems, a range of on-going support including helpdesk facilities both remote and onsite as required by the member, maintenance, development and innovation, de-commissioning, and handover to future providers.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

48

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: Yes

Description of options

48 month(s) from the commencement date, with 24 initial month(s) and option to extend 2x12 month(s)

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

NUTS codes

- UK - United Kingdom

Main site or place of performance

Greater Manchester

II.2.4) Description of the procurement

Lot 9 – Estates Management Software including CAFM Systems

This lot is for the provision of Estates Management Software to support and enhance the administration and operations for members institutions.

The Software provision includes but is not limited to full Computer Aided Facilities Management Systems (when managed by the member institution), Estates (and IT) fault reporting software and systems including ticketing and helpdesk provision as required by members.

Accommodation and Letting Bookings Software aimed at but not limited to colleges with halls of residents. Contractor / Supplier Management, Stock Control, and Asset Management Software, Risk Management Software, COSHH Management Software, Health and Safety Software, Estates Compliance Software, Building Management Software to include but not limited to control systems for temperature, lighting and energy management, Onsite Visitor and Staff / Student Management Software, Space Management and Room Booking Software and other facilities management and estates related software.

Systems including but are not limited to the following aspects of supply as required by members:

- Software provision to be used in an estate's capacity ensuring ease of use with the ability to work, organise and share data, documents and files as required by members
- Software and tools to include Computer Aided Facility Management (CAFM) software with the ability for members to plan, execute and monitor all activities involved in reactive

and planned preventative maintenance, space and move management, asset management, operational facility services, room reservations and other customer services. This is aimed at where members will be managing their facility management requirements internally and not outsourcing this requirement. *

- Other Estates software and tools for standalone requirements or as specified by members including but not limited to Estates (and IT, where provided as part of an estates requirement) fault reporting software and systems including ticketing and helpdesk provision as required by members. Accommodation Software aimed at but not limited to colleges with halls of residents. Contractor / Supplier Management, Asset Management Software, Risk Management Software, COSHH Management Software, Health and Safety Software, Estates Compliance Software, Building Management Software to include but not limited to control systems for temperature, lighting and energy management, Onsite Visitor and Staff / Student Management Software, Space Management and Room Booking Software
- Software to support and range of work methodologies and project types in line with best practice
- Provision for software intended for time management and identification of bottlenecks as required by members
- Effective management of workloads, assignment of projects and tasks
- Automation and template provision to enable focus of individuals and groups to drive efficiencies
- Potential for supporting shared service offer for other organisations if required by members
- “Workflow” flexibilities to include but not limited to absence management procedures
- Fully compatible and automated interface with other systems as required by members
- Reporting, in a format understandable to users with a simple to use integrated report writer capable of enabling users to produce and store high quality and visually presentable reports in a professional standard/layout as appropriate software dependant and as specified by members
- The ability to store documents including but not limited to scanned images of prime documents
- The security maintenance of the system must satisfy requirements including but not limited to segregation of duties, however there is a need to maintain the flexibility required

in a large complex organisation such as a multi academy trusts and not be overly burdensome in its administration for academies, schools, colleges or as appropriate

Further further details please see the ITT.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Duration in months

48

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: Yes

Description of options

48 month(s) from the commencement date, with 24 initial month(s) and option to extend 2x12 month(s)
