Award

MODAS Software Support, Development & Maintenance

Northern Ireland Fire & Rescue Service

F15: Voluntary ex ante transparency notice

Notice identifier: 2025/S 000-003872

Procurement identifier (OCID): ocds-h6vhtk-04dbfe

Published 5 February 2025, 4:49pm

Section I: Contracting authority/entity

I.1) Name and addresses

Northern Ireland Fire & Rescue Service

Ardglass Road Downshire Civic Centre

DOWNPATRICK

BT306RA

Email

NIFRSProcurement@nifrs.org

Country

United Kingdom

Region code

UKN08 - Newry, Mourne and Down

Justification for not providing organisation identifier

Not on any register

Internet address(es)

Main address

<https://www.nifrs.org/>

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Public order and safety

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

MODAS Software Support, Development & Maintenance

II.1.2) Main CPV code

- 72222300 - Information technology services

II.1.3) Type of contract

Services

II.1.4) Short description

MODAS RAM is a tailored database system that allows NIFRS to manage its Risk Critical Information (RCI). RCI is intelligence gathered by NIFRS crews about premises that pose an abnormal risk to the community or firefighters. MODAS RAM allows crews to record RCI by way of a Premise Information Update (PIU). NIFRS require the continued support and maintenance of MODAS RAM, along with any possible future developments that may be

required to maintain the software, until the implementation of a new Mobile Data Solution.

Whilst MODAS RAM is used at Fire Station level to compile, input and retrieve site specific risk critical information required to be captured and presented under NIFRS Standard Operating Procedure 12 (SOP12). Together MODAS Manager and MODAS RAM are interfaced and work together to collect and distribute the complete range of information and intelligence required for Incident command support, location of water for firefighting, mapping, risk information and so on which is presented to crews on the MDT's installed on all front line appliances. NIFRS require continued support and maintenance for MODAS Manager and RAM.

MODAS RAM Geode Maintenance - In order for MODAS RAM to correctly identify the location of a site specific risk and subsequently plot that information on a geographic interface which is displayed on the MDT's, it needs to have access to an address gazetteer which is accurate in terms of a 12 figure grid reference. Compass (Version 8) has been installed in order to interface systems to the corporate gazetteer. A "knock-on" effect of this is that the MODAS RAM interface to the LPS gazetteer had to be upgraded in order to maintain functionality. NIFRS require the ability to maintain an accurate gazetteer location tool and to ensure the consistency of data held in the MODAS RAM application.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £240,000

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKN - Northern Ireland

II.2.4) Description of the procurement

MODAS RAM is a tailored database system that allows NIFRS to manage its Risk Critical Information (RCI). RCI is intelligence gathered by NIFRS crews about premises that pose an abnormal risk to the community or firefighters. MODAS RAM allows crews to record RCI by way of a Premise Information Update (PIU). NIFRS require the continued support and maintenance of MODAS RAM, along with any possible future developments that may be

required to maintain the software, until the implementation of a new Mobile Data Solution. Any updates required would be part of a call off for service work days if required (max 6 per calendar year).

MODAS Manager is used by Regional Control Centre (RCC) Systems Support personnel and prepares and packages a range of Firefighter RCI for electronic distribution onto fire appliance Mobile Data Terminals (MDT's). Whilst MODAS RAM is used at Fire Station level to compile, input and retrieve site specific risk critical information required to be captured and presented under NIFRS Standard Operating Procedure 12 (SOP12). Together MODAS Manager and MODAS RAM are interfaced and work together to collect and distribute the complete range of information and intelligence required for Incident command support, location of water for firefighting, mapping, risk information and so on which is presented to crews on the MDT's installed on all front line appliances. NIFRS require continued support and maintenance for MODAS Manager and RAM.

MODAS RAM Geode Maintenance - In order for MODAS RAM to correctly identify the location of a site specific risk and subsequently plot that information on a geographic interface which is displayed on the MDT's, it needs to have access to an address gazetteer which is accurate in terms of a 12 figure grid reference. Compass (Version 8) has been installed in order to interface systems to the corporate gazetteer. A "knock-on" effect of this is that the MODAS RAM interface to the LPS gazetteer had to be upgraded in order to maintain functionality. NIFRS require the ability to maintain an accurate gazetteer location tool and to ensure the consistency of data held in the MODAS RAM application.

II.2.11) Information about options

Options: Yes

Description of options

option to extend by 4 12 month period(s)

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

MODAS software was provided by 3TC Ltd who have now been taken over by Motorola Solutions. Therefore Motorola Solutions now have sole source exclusive rights to this Software which NIFRS critically require.

Exclusive Rights 32(2)(b)(iii) Reasons apply.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes

Section V. Award of contract/concession

Title

MODAS Software Support, Development & Maintenance

A contract/lot is awarded: Yes

V.2) Award of contract/concession

V.2.1) Date of conclusion of the contract

5 February 2025

V.2.2) Information about tenders

The contract has been awarded to a group of economic operators: No

V.2.3) Name and address of the contractor/concessionaire

Motorola Solutions UK Limited

London

Country

United Kingdom

NUTS code

- UK - United Kingdom

Companies House

00912182

The contractor/concessionaire is an SME

No

V.2.4) Information on value of contract/lot/concession (excluding VAT)

Total value of the contract/lot/concession: £240,000

Section VI. Complementary information

VI.3) Additional information

The Client cannot guarantee any particular level of business within the Contract. Any information on value of business are for guidance only and no guarantee is given as to the exact value under this Contract. Any levels, or aggregate values of services, referred to are indicative only and shall not be binding on the Client.

VI.4) Procedures for review

VI.4.1) Review body

The UK does not have any such bodies with responsibility for appeal/mediation procedures. Instead; any challenges are dealt with by the High Court, Commercial Division, to which proceedings may be issued regarding alleged breaches of the PCR 2015 as amended.
