II.1.4) Short description

The Goose and Swan Monitoring Programme (GSMP) is an established monitoring programme that aims to deliver population estimates and trends both at UK and at site level for selected goose and migratory swan populations, as well as to provide data and information about the demographic factors (e.g. breeding success) driving those trends. The results enable us to assess the status of geese and swans wintering in the UK and inform conservation action. The GSMP coordinates a suite of volunteer-based surveys and collates relevant goose and swan survey data collected by third parties. Regarding estimate of contract value, JNCC would welcome partner co-funding contribution or in-kind contribution.
