II.2.4) Description of the procurement

Birmingham and Solihull Mental Health NHS Foundation Trust and Birmingham Women's and Children's NHS Foundation Trust Forward Thinking Birmingham are looking to develop a multi-agency collaborative to provide short stay environments for individuals experiencing an acute mental health crisis, aged 18+.

Such a facility would provide a viable recovery-based resource for those who may be escalating toward a psychiatric inpatient admission and for those who may be considered for a step-down provision from an acute inpatient bed. It is intended to support those who would benefit from brief biopsychosocial interventions during short term crisis. The crisis would be viewed as "the moment when the typical activities of the service user's day break down".

Access to the Recovery House facility will be managed through a number of clinical referral routes. Whilst not excluding any individual meeting the above criteria, users of the service will need to be fully compliant with the behavioural expectations of the Recovery House and have a clear understanding that non-compliance with such agreement will lead

to termination of stay.

Commissioners are seeking an organisation that can either;

1. Provide the accommodation only
2. Provide accommodation and a shared staffing model
3. Provide accommodation and all staff

It is suggested the Recovery House would provide a maximum total of 14 beds, preferably comprising 8 mixed and 6 female only with a maximum financial envelope of circa £794,189 (for option 2) and £1,080,433 (for option 3); to include flexibility for on-going transformational development, vision and potentials for invest to save.

Users of the service can have several strictly time limited admissions throughout the year to support crisis, prevent escalation and hospital admission avoidance.

The Recovery House will be a 24 hours service and needs to be accessible 7 days a week. The facility must provide a safe environment and support in which service users will receive immediate assistance in identifying the nature of the crisis and how this may be addressed. This will be achieved by using a model of co-production, solution focused and other brief interventions. The expected duration of a service users stay will be 7 nights.
