Body governed by public law

I.5) Main activity

Other activity

Registered Charity

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

EOL AI Customer Chat Bot

Reference number

BC/03768

II.1.2) Main CPV code

- 48445000 - Customer Relation Management software package

II.1.3) Type of contract

Supplies

II.1.4) Short description

British Council English Online offers personalized language courses to help learners gain confidence and improve their speaking, pronunciation, and vocabulary skills. Our platform provides small group classes and private one-to-one sessions, allowing students to customize their timetable based on their goals and interests. We cater to all proficiency levels, from beginner to advanced. At any point during the student's journey, they may need assistance and guidance for: Getting started and where to go next, how to navigate the site Guidance through the sign up/registration process Answering common questions on services, policies, offers Being able to handle questions in different languages and to respond in that language Product suggestions based on history and user preferences Personalised promotions/discounts Allowing the user to provide feedback and to also include short surveys Current monthly website traffic: ~800,000 visitors

II.1.5) Estimated total value

Value excluding VAT: £200,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 48445000 - Customer Relation Management software package
- 48481000 - Sales or marketing software package

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

Last year the British Council led 9M new users to the English Online website. Users take longer to make their decision: While we are increasing conversion rate to transactions through A/B testing, we have seen an increase in time in which the users decide to purchase. Different cultures, different needs: We also concluded onsite surveys to understand what information users need and to adapt content accordingly. We realised that depending on where users are from, they might need different information on the website. Best practice is to provide language pages and using a chatbot to personalise information they need to make their decision (provide answers to different questions).Lack of attention: The attention span of a user has dropped down to 8 seconds and they are looking for quick answers to their questions.Quick solutions: In today's fast-paced digital environment, customers expect quick response to their questions. They do not really look at the FAQ pages (don't look around to search for an answer) but rather want to be presented with an answer as quickly as possible. If they don't, they move on to the competition. Therefore we are looking at how we can use AI powered Chatbots which can handle multiple inquiries simultaneously and allows for scalability. With personalized recommendations and responses based on user data and behaviour, to enhance overall customer experience

II.2.14) Additional information
