Description

The course is for 9 delegates to undertake the 4-day Magnet Graykey Examinations (GK200) training.

In this course, students will get hands-on use of the Graykey device and learn how to fully operate it-including how to establish a proper workflow for handling iOS and Android devices both in the field and in the lab and leveraging the Graykey to obtain crucial data from mobile-type devices.

Magnet Axiom will also be leveraged to learn how mobile file systems are structured and how to locate key data. In addition, students will learn about artefacts specific to the extraction outputs of Magnet Graykey and the differing levels of data protection implemented on modern mobile devices. From Keychain and Keystores, to advanced methodologies to uncover operating system artifacts, students will learn how to effectively

and efficiently deal with data from mobile devices, no matter the extraction level and/or device state.
