Main site or place of performance

Edinburgh Cancer Research Centre, The University of Edinburgh, Western General Hospital, Crewe Road South, Edinburgh, EH4 2XR.

#### **II.2.4) Description of the procurement**

A dual-output packaged laser solution that operates as a 'turn key' system. This would combine a fixed wavelength beam to act as a Stokes beam, and a tunable laser beam that covers the biological Raman spectrum range when combined with the Stokes beam, all housed in one box requiring little specialist knowledge to run, as well as offering a small footprint and help with health and safety requirements. This will form part of a multimodal imaging platform which is designed to complement our work on Stimulated Raman Scattering (SRS) microscopy.

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.1) Type of procedure**

Award of a contract without prior publication of a call for competition in the cases listed below

- The services can be provided only by a particular economic operator for the following reason:
  - absence of competition for technical reasons

Explanation:

Although a number of manufacturers produce dual output lasers for biological use that cover many of the requirements, they are femtosecond lasers. The spectral bandwidth on these laser pulses are typically around 100 cm<sup>-1</sup> making them ideal for fluorescence and harmonic imaging but unsuitable for SRS imaging of narrow Raman bands that we require.

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: Yes
