II.1.3) Type of contract

Works

II.1.4) Short description

Home adaptations are changes made to the fabric and fixtures of a home to make it safer and easier to get around and to use for everyday tasks like cooking and bathing. Adapting a home environment can help restore or enable independent living, privacy, confidence and dignity for individuals and their families.

Adaptations can include the installation of stair-lifts, level access showers and wet-rooms, wash and dry toilets, ramps, wider doors, and, in some instances, bespoke home extensions to existing dwellings as well as improvements to access to and from gardens. Heating systems, insulation and telecare and assistive technology (where it is capital) can be other forms of adaptations.

Disabled Facilities Grants are capital grants that are available to people of all ages and in all housing tenures (i.e. whether renting privately, from a social landlord or council, or owner-occupiers) to contribute to the cost of adaptations.

They are administered by local housing authorities in England and enable eligible disabled people to continue living safely and independently at home. This includes autistic people, those with a mental health condition, physical disabilities, learning disabilities, cognitive impairments such as dementia, and progressive conditions such as Motor Neurone Disease. It includes those suffering from age-related disabilities and can also include those with terminal illness. The DFG is one of a range of housing support measures that a local authority can use to help enable people to live independently and safely at home and in their communities.

Lichfield District Council require a Framework of qualified contractors who will deliver quality works in a timely manner, with due consideration for the needs of the disabled person and their family.
