Contract

Data Harmonisation and System Interoperability – Phase 3

Health Innovation North East and North Cumbria

F03: Contract award notice

Notice identifier: 2024/S 000-004458

Procurement identifier (OCID): ocds-h6vhtk-03cfc6

Published 9 February 2024, 2:25pm

Section I: Contracting authority

I.1) Name and addresses

Health Innovation North East and North Cumbria

Biomedical Research Building, Campus for Ageing and Vitality, University of Newcastle,
Nuns Moor Road

Newcastle-upon-Tyne

NE4 5PL

Contact

Mrs Liz Brown

Email

businessdevelopment@healthinnovationnenc.org.uk

Telephone

+44 1912081326

Country

United Kingdom

Region code

UK - United Kingdom

Internet address(es)

Main address

<https://healthinnovationnenc.org.uk/>

Buyer's address

<https://healthinnovationnenc.org.uk/>

I.4) Type of the contracting authority

Other type

Company limited by guarantee

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Data Harmonisation and System Interoperability – Phase 3

Reference number

DN708253

II.1.2) Main CPV code

- 79000000 - Business services: law, marketing, consulting, recruitment, printing and security

II.1.3) Type of contract

Services

II.1.4) Short description

Innovation pipeline data, plus outcome and impact data, is currently collected using different tools, stored differently, and has various definitions across partner organisations. This means that understanding the pipeline is complicated and needs to be improved.

The Innovation, Research, Life Sciences and Transformation Strategy (IRLSS) group has ambitions to improve its horizon scanning and demand signalling (HS & DS) capability and to align different and disparate data sources better to enable data-driven decision-making. We are aiming to align these different datasets with a view to creating an innovation repository. The repository would combine data from the Health Innovation organisations (HI's), the NHS Innovation Service and other sources (including awards, such as the NHS Innovation Accelerator (NIA)) to provide intelligence about innovations moving along the innovation pathway and their impact. For obvious reasons, we are not necessarily looking to create a single data source from the current disparate sources. Still, we need to align our datasets pragmatically to give a more coherent view of the market in a particular area, accessed more easily. The resulting data views will be used to support HS & DS, to identify technologies that do not offer additional benefits, and recognise where there are barriers to development and where there are issues with progress along the pipeline which could influence policy. This information will also support the NHS in understanding, prioritising, and preparing for incoming innovations.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £131,040

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

Innovation in digital technologies, greater use of data and technology-enabled transformation are ways to support the NHS in addressing the pressures it is currently facing. Many innovative solutions are coming onto the market all the time, all in different

states of market readiness. In recent years, through the creation of the Accelerated Access Collaborative, the AI funding awards and other initiatives, including most recently the intention to re-licence the AHSNs (now called Health Innovation networks), the NHS has developed the infrastructure needed to enable the NHS to adopt innovation more widely. However, this is a complex landscape, and we currently need a means of tracking innovations as they move along the innovation pathway, from demand signalling and horizon scanning to ideation and development, approval, adoption and spread. This means the NHS has an incomplete view of the innovations available to support a particular need and is frequently unsighted on the timescales within which innovations are likely to come to market.

II.2.5) Award criteria

Quality criterion - Name: Technical response / Weighting: 50%

Quality criterion - Name: Social Value / Weighting: 15%

Price - Weighting: 35%

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Restricted procedure

IV.1.3) Information about a framework agreement or a dynamic purchasing system

The procurement involves the setting up of a dynamic purchasing system

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

IV.2) Administrative information

IV.2.1) Previous publication concerning this procedure

Notice number: [2023/S 000-015073](#)

Section V. Award of contract

Contract No

DN708253

Lot No

2

A contract/lot is awarded: Yes

V.2) Award of contract

V.2.1) Date of conclusion of the contract

9 February 2024

V.2.2) Information about tenders

Number of tenders received: 1

The contract has been awarded to a group of economic operators: No

V.2.3) Name and address of the contractor

Channel 3 Consulting Ltd

Southwark

SE1 1LB

Country

United Kingdom

NUTS code

- UK - United Kingdom

The contractor is an SME

Yes

V.2.4) Information on value of contract/lot (excluding VAT)

Total value of the contract/lot: £131,040

Section VI. Complementary information

VI.4) Procedures for review

VI.4.1) Review body

Health Innovation NENC

Newcastle upon Tyne

Country

United Kingdom
