Defence

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Indicators and Warnings (I&W) Tool Contract Notice

II.1.2) Main CPV code

- 48100000 - Industry specific software package

II.1.3) Type of contract

Supplies

II.1.4) Short description

The MOD requires an Open-Source Intelligence service that provides timely Indicators and Warnings

(I&W) from publicly available information (PAI) sources. The I&W toolset will be web-

based

(accessible by any web browser) and enable the MOD to exploit a variety of real time sources. The

solution will generate defence related alerts and feeds from a broad scope of emerging events with

worldwide coverage. Alerts and feeds will be delivered in a variety of methods, include platform

generated verification scoring and enable content to be translated from native script into English.

The user will access alerts and data via API, have the ability to continuously customise alerts and

feeds, set priority levels, and conduct trend analysis of historical alerting data. Users will be

provided initial training (preferably online) and additional training, as required. MOD administrators

will determine user logs, monitor/audit account usage and carry out general user management

activities. Delivery and filtering of alerts and feeds will be accessible via Apple IOS, Android devices

and through MOD accredited IT systems.

The I&W toolset procurement is currently in its initiation phase and it is anticipated that Contract

Award will be in June 22 for a duration of three (3) years.

II.1.5) Estimated total value

Value excluding VAT: £375,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

II.2.4) Description of the procurement

The MOD requires an Open-Source Intelligence service that provides timely Indicators and Warnings

(I&W) from publicly available information (PAI) sources. The I&W toolset will be web-based

(accessible by any web browser) and enable the MOD to exploit a variety of real time sources. The

solution will generate defence related alerts and feeds from a broad scope of emerging events with

worldwide coverage. Alerts and feeds will be delivered in a variety of methods, include platform

generated verification scoring and enable content to be translated from native script into English.

The user will access alerts and data via API, have the ability to continuously customise alerts and

feeds, set priority levels, and conduct trend analysis of historical alerting data. Users will be

provided initial training (preferably online) and additional training, as required. MOD administrators

will determine user logs, monitor/audit account usage and carry out general user management

activities. Delivery and filtering of alerts and feeds will be accessible via Apple IOS, Android devices

and through MOD accredited IT systems.

The I&W toolset procurement is currently in its initiation phase and it is anticipated that Contract

Award will be in June 22 for a duration of three (3) years.
