II.1.4) Short description

Crown Commercial Service (CCS) is seeking a self-service print platform to bring under management the high-volume, low-spend print requirements across the public sector, allowing access to a pre-qualified, dynamic and local supplier base who offer real-time pricing across the print landscape. This will enable end users to access the best solution for their print requirements based on variables including price and location. It is anticipated that this will be through an external-facing technology platform that provides real-time access to a vendor database of local printers who can offer dynamic pricing for customers' various print requirements.

This framework will have a single supplier lot and can be used by Central Government and UK public sector bodies.

Further information is included in the Additional Information section VI.3.

II.1.5) Estimated total value

Supplier assurance requirements:

The Cyber Essentials scheme is mandatory for Central Government Contracts which involve handling personal information and providing certain ICT products and services. The Government is taking steps to further reduce the levels of cyber security risk in its supply chain through the Cyber Essentials scheme. The scheme defines a set of controls which, when properly implemented, will provide organisations with basic protection from the most prevalent forms of threat coming from the internet.

To participate in this procurement, bidders will be required to demonstrate that they are

Cyber Essentials Plus certified for the services under and in connection with the procurement.

The bidder may be awarded a contract but shall not enter into any call off contracts with buyers until they are able to demonstrate to CCS that they meet the technical requirements prescribed by the Cyber Essentials Plus Scheme for services under and in connection with this procurement.

Additional supplier assurance requirements will be made available during the market engagement sessions and at the time of tender release.
