## Section II: Object

### II.1) Scope of the procurement

#### II.1.1) Title

VEAT Notice for the Provision of LABScreen Testing Kits, LINKSEQ Testing Kits and LABType Typing Kits

Reference number

C334057

#### II.1.2) Main CPV code

- 33696000 - Reagents and contrast media

#### II.1.3) Type of contract

Supplies

#### II.1.4) Short description

Manchester University NHS Foundation Trust intends to award a contract to VH Bio for the provision of LABScreen Testing Kits, LINKSEQ Testing Kits and LABType Typing Kits.

The Trust currently utilises One Lambda HLA antibody screening (LABScreen) testing kits for use with LABScan3D analysers, which have been previously procured, to detect and define HLA specific antibodies. The LABScreen kits are a trademark of One Lambda which are routinely used to screen patient serum samples in the pre- and post-transplant setting for both solid organ and haematopoietic progenitor stem cell transplant recipients. The LABScreen kits are the most reliable and informative kit available, and this kit is needed for consistency with longitudinal testing. VH Bio provide the Trust with technical support for the products. The Transplant Laboratory has been accredited by the United Kingdom Accreditation Service for performing HLA antibody detection and definition using the LABScreen testing kits with the LABScan3D testing platform.

The Trust currently utilises LINKSEQ testing kits for use with LightCycler 480 ii and Quantstudio 7 Flex real-time PCR instruments for HLA typing, which have been previously procured. The LINKSEQ kits are the only compatible SSP kits for the LightCycler 480 II and Quantstudio 7 Flex real-time PCR instruments for HLA typing of DNA tests undertaken. The LINKSEQ wipe tests are required for quality control and are a requirement of accreditation standards. The Transplant Laboratory has been accredited by the United Kingdom Accreditation Service for performing HLA typing using the LINKSEQ testing kits with the Light Cycler 480 II and Quantstudio 7 Flex real-time PCR

instruments.

The Trust currently utilises LABTYPE HLA and KIR typing kits and ancillary reagents for use with the LUMINEX LABScan 3D instruments, which have been previously procured. The LABType kits and ancillary reagents are compatible with the LUMINEX LABScan 3D instruments for DNA tests undertaken. The Transplant Laboratory has been accredited by the United Kingdom Accreditation Service for performing HLA typing using the LABType kits with the LUMINEX LABScan 3D system.

As such, a negotiated procedure without prior publication will be followed and is believed to be justified under section 32(2) (b) (ii) of the Public Contracts Regulations 2015 - 'competition is absent for technical reasons'.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

#### **II.1.7) Total value of the procurement (excluding VAT)**

Value excluding VAT: £2,218,515

### **II.2) Description**

#### **II.2.3) Place of performance**

NUTS codes

- UKD33 - Manchester

#### **II.2.4) Description of the procurement**

Manchester University NHS Foundation Trust intends to award a contract to VH Bio for the provision of LABScreen Testing Kits, LINKSEQ Testing Kits and LABType Typing Kits.

The estimated total value for this contract is £2,218,515, with a total maximum term of 36 months, made up of 12 month initial term with a further 24 month extension in 12 month increments.

#### **II.2.11) Information about options**

Options: Yes

Description of options

Manchester University NHS Foundation Trust is able to extend the contract for a further

24 months in 12 month increments.

---

## Section IV. Procedure

### IV.1) Description

#### IV.1.1) Type of procedure

Negotiated without a prior call for competition

- The works, supplies or services can be provided only by a particular economic operator for the following reason:

- absence of competition for technical reasons

Explanation:

Manchester University NHS Foundation Trust intends to award a contract to VH Bio for the provision of LABScreen Testing Kits, LINKSEQ Testing Kits and LABType Typing Kits.

The Trust currently utilises One Lambda HLA antibody screening (LABScreen) testing kits for use with LABScan3D analysers, which have been previously procured, to detect and define HLA specific antibodies. The LABScreen kits are a trademark of One Lambda which are routinely used to screen patient serum samples in the pre- and post-transplant setting for both solid organ and haematopoietic progenitor stem cell transplant recipients. The LABScreen kits are the most reliable and informative kit available, and this kit is needed for consistency with longitudinal testing. VH Bio provide the Trust with technical support for the products. The Transplant Laboratory has been accredited by the United Kingdom Accreditation Service for performing HLA antibody detection and definition using the LABScreen testing kits with the LABScan3D testing platform.

The Trust currently utilises LINKSEQ testing kits for use with LightCycler 480 ii and Quantstudio 7 Flex real-time PCR instruments for HLA typing, which have been previously procured. The LINKSEQ kits are the only compatible SSP kits for the LightCycler 480 II and Quantstudio 7 Flex real-time PCR instruments for HLA typing of DNA tests undertaken. The LINKSEQ wipe tests are required for quality control and are a requirement of accreditation standards. The Transplant Laboratory has been accredited by the United Kingdom Accreditation Service for performing HLA typing using the LINKSEQ testing kits with the Light Cycler 480 II and Quantstudio 7 Flex real-time PCR instruments.

The Trust currently utilises LABTYPE HLA and KIR typing kits and ancillary reagents for use with the LUMINEX LABScan 3D instruments, which have been previously procured.

The LABType kits and ancillary reagents are compatible with the LUMINEX LABScan 3D instruments for DNA tests undertaken. The Transplant Laboratory has been accredited by the United Kingdom Accreditation Service for performing HLA typing using the LABType kits with the LUMINEX LABScan 3D system.

As such, a negotiated procedure without prior publication will be followed and is believed to be justified under section 32(2) (b) (ii) of the Public Contracts Regulations 2015 - 'competition is absent for technical reasons'.

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: No
