II.2.4) Description of the procurement

An automated monitoring system for cold storage management from a temperature range of -196 to +150 degrees. The technical specification of the solution is the only solution that can meet the full range of the University's requirements, which includes but is not limited to:

- A resilient cloud software platform with remote access from anywhere at any time, which is not reliant on client software.
- Utilising LAN connection to the university network to ensure resilience in event of wifi failure.
- ISO accredited sensor calibration, and remote troubleshooting.
- A 24/7/365 call centre alarm response for high-value, and high-risk units.
- Mains AC power supply for power resilience, with back-up long-life batteries in the event of power failure.
- An audible alarm from the sensor itself, meaning problems can be attended to without having to consult the portal.
