Section II: Object

II.1) Scope of the procurement

II.1.1) Title

HAWTT Research and Development Thermal Treatment Programme - Tranche 2 ILW Technology

II.1.2) Main CPV code

- 42940000 - Machinery for the heat treatment of materials

II.1.3) Type of contract

Supplies

II.1.4) Short description

The Higher Activity Waste Thermal Treatment (HAWTT) research and development programme seeks to develop active demonstrators to consider the impact of thermal treatment technologies on specific forms of High Level Waste. The specific waste form in this case is Intermediate Level Waste Sludge. Advancing on current thermal treatment technologies, Sellafield have been requested by the Nuclear Decommissioning Authority (NDA) to deliver active demonstrators to produce information that may underpin a strategic decision as to the most appropriate means of treating specific forms of this High Level Waste, so that it may be stored and managed safely. This will further inform the broader strategic direction across the NDA estate.

The Contract to which this VEAT relates, is for the supply of a distinct thermal treatment technology for deployment within the development of an integrated system for the purposes of research of development.
