Scope

Description

Over the past 5 years the London Borough of Barking & Dagenham (the Council) has implemented an innovative data platform called OneView. At its core, the platform loads data extracted from other Council systems and matches it at the household level to create a 'golden record' of resident data. Using this platform, we have matched data from five key service areas (Revenues & Benefits, Adults Social Care, Children's Social Care, Housing and Education) to enable a 'single view' of households in our borough. Notably, OneView can receive and process both structured and unstructured data, using natural language processing to read and interpret case notes. Building off this core infrastructure we have

developed a range of tools that enable the Council to work efficiently, and deliver better outcomes for residents. Further information can be found on the ITT Pack Tender responses due 12noon, 21st January 2026. <https://lbbd.bravosolution.co.uk/web/login.shtml>

Total value (estimated)

- £500,000 including VAT

Above the relevant threshold
